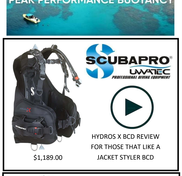
SCUBAPRO MK19 EVO/G260 REGULATOR

The MK19 EVO/G260 regulator is perfect for ANY CONDITIONS, ESPECIALLY those who dive deep, in cold water, or in silty environments. This system is ideal for harsh conditions, making it a top choice for tech divers and cave explorers. The compact MK19 EVO is fully sealed, ensuring trouble-free operation in cold or murky waters. The G260 is a highly imitated air-balanced second stage with metal components and a left-right adjustment option, making it excellent for tech diving setups and a consistent top performer.

simply the best



Aqualung presents us with the Helix, a mid-priced regulator, which enjoys very good performance, undoubtedly above expectations.

It represents the DNA of the Aqualung regulators. It is without Question the best option in terms of value for money currently available.

The Helix Pro version has two added features:

Aqualung's patented ACD system, technology that protects the first stage from accidental entry of water or dirt even when the regulator is not under pressure.

And sealed ambient pressure chamber, suitable for cold and/or polluted waters.

Aqua Lung LegEnd Regulator

Aqua Lung

EVERYTHING YOU'D EVER WANT IN A REGULATOR

$959.00

Aqua Lung Computer i550C with Compass NH

The i550C is an easy-to-use, rugged, and versatile dive computer perfect for both new and seasoned divers alike. Equipped with a comprehensive suite of features, including Bluetooth, gas integration, Nitrox and Gauge modes, backlight technology, and gas time remaining in an easy-to-read, large face console, it allows you to focus on your dive. The i550C is easy customizable, with an optional quick disconnect for convenient storage and a top-mount compass, making this computer the sure choice for your dive kit.

ON SALE $700.00

Suunto Nautic Dive Computer w/ Bungee Cord & Tank Pod

Made for Every Dive and Every Diver!

From recreational dives to technical missions, Suunto Nautic grows with your passion. It supports single- and multi-gas configurations, sidemount setups, and full decompression planning. Customize your dive views to you choose what matters most at every depth. Whatever your dive style, Nautic adapts to it seamlessly.

Real-Time Awareness, Wireless Precision

Wireless tank pressure tracking gives divers real-time gas readings and consumption data at a glance. Dual transmitter support makes it easy for sidemount divers to follow both tanks simultaneously, while clear, color-coded visuals keep you instantly informed throughout the dive.

Stay Oriented Above and Below the Surface

Suunto Nautic integrates essential navigation and safety tools to keep you oriented wherever you dive. Offline maps and GPS help plan and track your routes, while the built-in digital compass provides precise direction underwater. Tide, weather, and sunrise/sunset data support safe surface intervals, and the integrated flashlight brings visibility and

The new MK11 EVO/R105

This regulator is a simple, rugged and reliable air delivery system. The MK11 EVO is a compact balanced diaphragm first stage with a forged brass body fitted with thermal fins and protective plastic bumpers to ward off scratches. The R105 delivers smooth, dependable air flow from its classic downstream valve design. Built to last, the R105 features a durable metal valve housing and an anti-scratch front cover.

$585.00

Scubapro MK11/C370 Regulator

The MK11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism.

IT'S TIME TO OWN YOUR OWN BCD

INTERESTING

I read the following and thought it was worth sharing, especially in these brutal times that cause dismay and much hardship:

NASA- National Aeronautics and Space Administration
Astronaut

During a BRUTAL study at Harvard in the 1950s, Dr. Curt Richter placed rats in a pool of water to test how long they could tread water. On average they'd give up and sink after 15 minutes. But right before they gave up due to exhaustion, the researchers would pluck them out, dry them off, let them rest for a few minutes - and put them back in for a second round.

In this second try - how long do you think they lasted? Remember - they had just swum until failure only a few short minutes ago...How long do you think? Another 15 minutes? 10 minutes? 5 minutes?

No!
60 hours!

That's not an error. That's right! 60 hours of swimming. The conclusion drawn was that since the rats BELIEVED that they would eventually be rescued, they could push their bodies way past what they previously thought impossible.

I will leave you with this thought:
If hope can cause exhausted rats to swim for that long, what could a belief in yourself and your abilities, do for you? Remember what you're capable of. Remember why you're here.
Keep swimming.
