equipment lined up on the beach via an emerald lagoon and slide through a small crack to explore the sun filled passageways. This cenote is home to some amazing marine life including juvenile barracuda, sea stars and lobster. You enter this cenote from Cozumel itself. Aerolito de Paraiso (Paradise Crater) is only 5 minutes south of the main town and is a popular spot for divers of all levels. If you enjoy beach diving, then this dive site is the place for you. Not only can you dive this site during the day, but it is also possible to night dive here. The visibility is typically 30-40 feet, making for interesting sites. Barracuda Reef is a popular dive site located just north of Aerolito de Paraiso. This reef is home to a variety of marine life, including barracuda, eagle rays and large groupers. Keep your eyes open for the Blue Tang, also known as surgeonfish, which are commonly seen here. The Colombia wall is over 90 feet high and is home to a stunning cave, tunnel and cavern systems. When diving at this site, you can explore the reef from the inside out. Its tall heads of stony coral come together to create a unique underwater landscape. Palancar Reef is a fantastic site for more advanced divers, as the currents can be strong. It is known for its deep drop-offs and varied topography. Turtles, eagle rays, and large groupers have been seen there on a regular basis. This dive site is more for intermediate to advanced divers who are comfortable with strong currents.

Computers can also monitor your ascent rate and tank pressure, providing valuable information that can help you make informed decisions during your dive. These devices are a valuable tool for divers, as they can help you monitor your depth, time, and oxygen levels, allowing you to stay safe and confident underwater. The Apeks XTX50 Regulator is a popular choice for divers, as it provides reliable and consistent performance. It is designed to withstand harsh conditions and offer maximum comfort and convenience. The regulator features a number of useful functions, including a high flow diaphragm first stage, a cold water performance balanced diaphragm first stage, and a low work of breathing, year after year. The S600 delivery head is known for its fast breathing response, instant delivery of air on demand, great sensitivity and impressive airflow. The S600 delivery head is engineered specifically for cold water and harsh environments, making it a great choice for divers who are looking for performance balanced diaphragm first stage. Engineered specifically for cold water and harsh environments, its internal components are designed to be highly durable and resistant to damage. The regulator is made of high-quality materials that can withstand any weather condition, ensuring that you will be able to enjoy the sea for years to come. The Legend mark regulator, from Atomic, Sherwood, Genesis, Oceanic and Tusa, is one of the best on the market today. These regulators are known for their top performance. However, you must do your homework before buying any regulator, as you need to find one that will suit your needs. The Legend mark regulator is a great option, as it is known for its reliability and durability. The regulator is easy to use and provides an excellent flow of air, making it a great choice for divers of all levels.
