MAKE EVERY WEEKEND A DIVE WEEKEND

PADI DISCOVER SCUBA

SCUBA REVIEW

OR JUST COME AND PLAY

ANDOVER BRANCH YMCA POOL

SATURDAY JANUARY 15, 2022

Why PADI Scuba Review?
Are you a certified diver, but haven't been in the water lately? Are you looking to refresh your dive skills and knowledge? Are you a PADI Scuba Diver and want to earn your PADI Open Water Diver certification? If you answered yes to any of these questions then PADI Scuba Review is for you.

What do I need to start?
Hold a scuba certification
Minimum age: 10 years old

What will I do?
First, you'll review the safety information you learned during your initial training. Then, you head to the pool to practice some of the fundamental scuba skills

How long will it take?
A couple of hours

What will I need?
If you don't have your own gear you will need to rent gear.

I don't want a review, but I want to play?
No problem, just sign up and come play in the pool for a couple of hours...we wait you diving!

- \$75.00 for Refresher (includes gear rental and pool fee)
- No Refresher, don't have gear, but you want to play? Full gear rental \$50.00 plus and pool fee.
- Have all your gear but just want to play? \$15.00 plus tank fee
- IF YOU BOUGHT A SCUBA SYSTEM FROM US, IT'S FREE

STARTS AT NOON

WE CUSTOMIZE THE SCHEDULE JUST FOR YOU

PADI EQUIPMENT SPECIALTY COURSE... IS IT WORTH IT?

Don't miss a dive due to a scuba gear issue. Whether it's a blown O-ring, regulator problem, wetsuit tear or a broken fin strap, you can learn how to manage basic scuba equipment adjustments.

As a PADI Equipment Specialist, you are prepared for the basic scuba equipment maintenance, care and adjustments you'll encounter every day. In addition, you'll learn interesting background information about how your gear works, how it's repair and other information that helps you with your equipment investment.

Additionally, if you don't already have your PADI Advanced Certification, this course counts as one of your dives. More importantly this course counts toward a specialty needed for your Master Scuba Diver Certification.

PADI Equipment Specialty - How does it work?

To enroll in the PADI Equipment Specialty course in Bali, you must be a PADI Scuba Diver (or qualifying certification from another organization). No dives are required, so you can take the Equipment Specialist course any time of the year.

With the PADI equipment specialty course you will come to our dive center where our Instructor will go through the following with you:

- Review the theory, principles and operation of scuba diving equipment
- Learn about routine, recommended care and maintenance procedures, and equipment storage
- How to overcome common problems with equipment and recommended professional maintenance procedures (may include a demonstration of repair procedures).
- Gain simple suggestions for comfortable equipment configurations and an introduction to new gear (may include optional confined water dive to try new or unfamiliar equipment).

PADI Equipment Specialty - Where will I dive?

The PADI Equipment Specialty course is a non-diving specialty course which means that there are no dives included in the course.

WHY DIVE NITROX?

- Longer Bottom Times:** Recreational nitrox (21 - 40% oxygen) contains a lower percentage of nitrogen than air. The reduced percentage of nitrogen in recreational nitrox allows divers to extend their no-decompression limits (or dive time) by reducing nitrogen absorption - the less nitrogen there is in a diver's breathing gas, the slower his nitrogen absorption will be at a given depth. For example, according to the NOAA (National Oceanographic and Atmospheric Association) no-decompression dive tables, a diver using Nitrox 36 (or NOAA Nitrox II) may stay up to 50 minutes at 90 feet of sea water, while a diver using air may only stay a maximum of 30 minutes at this depth.
- Shorter Surface Intervals:** A diver using nitrox absorbs less nitrogen for a given depth and dive time than a diver using air. This means that the nitrox diver has less nitrogen to off-gas during a surface interval, which can shorten the required surface interval drastically. For example, a diver using Nitrox 32 (NOAA Nitrox I) can repeat a 50 minute dive to 60 feet after 41 minutes, while a diver using air must wait a minimum of 8 hours to repeat the same dive (using NOAA's no decompression dive tables).
- Longer Repetitive Dive Times:** Nitrox becomes especially useful for divers who engage in more than one dive per day. A diver using nitrox will have a longer allowable bottom time on a repetitive dive than a diver using air because the diver using nitrox has absorbed less nitrogen. For example, after a dive to 70 feet for 30 minutes, a diver using Nitrox 32 can stay at 70 feet for a maximum of 24 minutes if he immediately reenters the water. However, a diver performing the same series of dives on air may only stay at 70 feet for 19 minutes on his second dive (according to NOAA's no decompression dive tables).
- Reduced Exhaustion:** Many divers claim to feel less exhausted after a dive on nitrox than after a comparable dive on air. By reducing a diver's nitrogen absorption, nitrox may also reduce a diver's post-dive exhaustion.
- Shorter Decompression:** Technical divers use nitrox to reduce decompression requirements. If nitrox is used throughout the dive, the nitrox may require shorter or fewer decompression stops. If nitrox is used as a decompression gas (the diver only breathes nitrox during the decompression stops), the decompression stops will be shorter.

SHERWOOD SCUBA

WISDOM 3 COMPUTER

The computer has diver selectable large, deep stop reminders, DECO warnings, and has Air, Nitrox and Gauge Modes. The repetitive dive planning mode uses information from previous dives to see limitations of your next dive. Logging your dives is made easy with the dive log function that stores profiles for later recall and viewing.

AQUA LUNG

Aqua Lung i770R Computer with Transmitter and USB Cable

The most tech-savvy diver will appreciate the i770R's Bluetooth visibility TFT color screen, as well as its robust functionality and intuitive, compact design. With standard features that include a rechargeable battery, 3-axis full-tilt compass, easy three-button navigation, multiple gas capability and 4 operating modes, managing your dive has never been easier. And, with its hoseless gas integration via a paired-for-life transmitter and Diver-Log+ app, you can integrate technology and connectivity to all your dive adventures.

\$1,298.00

AQUA LUNG

Aqua Lung i330R Wrist Computer

The Aqua Lung i330R is the ideal choice for advanced divers who love exploring the world and need to rely on their dive computers anywhere they are. Thanks to its bright color screen, readable even in sunlight and its rechargeable battery, it won't let you down. With its 4 modes, 3 nitrox mixes, and Bluetooth connection, this is the best value for money dive computer from the Aqua Lung line-up.

\$359.00

SCUBAPRO

Scubapro MK19 EVO/G260 Regulator

If you dive deep, dive cold, or often find yourself on silty bottoms or in less-than-pristine waters, the MK19 EVO/G260 is the regulator system for the time. The new MK19 EVO is Scubapro's premium high performance balanced diaphragm first stage. Engineered specifically for cold water and harsh environments. Its internal components are completely sealed off from the elements so neither water nor pollution can get inside the chrome-plated marine grade brass body to foul the mechanism. This total sealing system also allows for a dry ambient pressure chamber which works to prevent freezing, provides better protection and improves performance, ensuring trouble-free operation no matter how cold or murky the water gets. Now think about it, if this regulator performance flawlessly in cold water it will also be a phenomenal regulator in warm temperate waters. This is just simply a great regulator at a great value.

IN STOCK \$919.00

Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.

SUUNTO

With integrated digital compass, air integration, and gas switching, Suunto Cobra3 simplifies your diving experience because all the information you need relating to depth, time, tank pressure, decompression status, and direction is available on one easy-to-read screen. The Suunto Cobra3 dive computer has it all without overwhelming you with tools you'll never need or use. One of the Cobra3's bragging rights is its 3-D compass, which will quickly become your new best friend; its ability to give a true reading, even at a 45° degree angle, will make keeping your heading easier than ever

\$589.95

APEKS

AQUA LUNG

The Apeks GTX50 Regulator

is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks GTX50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator.

SUUNTO

Suunto Eon Core Wrist Dive Computer with Transmitter and USB

CONQUER NEW TERRITORY

the compact Suunto EON Core is a great dive companion. Key details of every dive are easy to read from the clear color display with large, prominent digits and intuitive menu logic. Read important diving details at a glance from a clear, legible screen. Large numbers and texts with high-contrast colors are easy to see even in murky waters or when diving at night time. Use the new prominent display layout to further highlight critical dive data. This fully-featured and customizable dive computer is a reliable partner while exploring shipwrecks or admiring the colorful marine life.
