MAKE EVERY WEEKEND A DIVE WEEKEND

Wichita CPR Training
Provided by Amber Waves Diving Company

Wichita CPR Training Co., a subsidiary of Amber Waves Diving Company, is the leader in CPR, First Aid and Emergency First Response Training in Wichita, Kansas. We offer courses for American Heart Association (AHA), Emergency First Responder (EFR), American Safety and Health Institute, or the National Safety Council certifications. All of these courses are OSHA approved and meet the requirements of Kansas requirements for day care providers under Lexis Law. Most of our instructors are active, public safety professionals who work in law enforcement, firefighting, emergency medical services and other careers that give them the opportunity to use these skills regularly in real world scenarios. Give us a call today at (316) 775-6688 or email us at tyler@amberwavesdiving.com and find out why we are Wichita's leading CPR, First Aid, and Emergency First Response training provider.

Sunday from 1:00 to 5:00 pm

TRAINING AT BEAVER LAKE ARKANSAS

Beaver Lake is a man-made reservoir in the Ozark Mountains of Northwest Arkansas and is formed by a dam across the White River only a few hours drive from Wichita. Beaver Lake waters are deep, clean, and clear. Beaver Lake is optimal for scuba diving because the water is deep and visibility is great making for interesting sites.

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

PEAK PERFORMANCE BUOYANCY

GETTING AND STAYING NEUTRAL

BETTER AIR CONSUMPTION

BUILD SELF CONFIDENCE

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

EXPERIENCE A DIFFERENT KIND OF NIGHT LIFE

LEARN MORE HERE

PADI PEAK PERFORMANCE BUOYANCY SPECIALTY COURSE

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

THOUGHTS AND THANKS

Supply chain disruptions, reduced physical interactions and international travel restrictions are some of the challenges we, in the SCUBA business, have recently experienced. Businesses throughout the SCUBA industry have rolled up their sleeves and looked for many ways to mitigate the economic risk, which unfortunately is now a fact of life. With that said, you the customer will probably pay more when it comes to SCUBA and travel because inflation transcends all industries. I've been somewhat disheartened that a few of our major suppliers didn't wait to see if the inflationary trends were transitory as many political and economic talking heads have predicted. But on the other hand, maybe those suppliers know something that the rest of us don't want to believe. I do know that there is an emphasis by many of our suppliers to redirect or increase their efforts on digital expansion when it comes to marketing products to our customers. My worry is that this will further reduce our physical interactions with customers. This worries me because SCUBA is in the entertainment business. If you're a SCUBA diver you want to go places, do things, and most all...share the adventures with others. Our basic mission statement says, "Our goal is to effectively make SCUBA a part of the life and an adventure worth sharing." While many aspects of our business may change, know that we at Amber Waves Diving understand that a sustainable business cannot be run behind a keyboard and monitor. We will make every effort to develop goals and plans in the future that will enhance the social and physical interactions that is the very spirit of 'why' people love SCUBA. Whether it be more travel, more training initiatives, affordable pricing policies, or enhanced facilities we are committed to the continued growth of the sport we love. You, our customer our friend, will always be our number ONE priority. God Bless.

Apeks XT50 Regulator

The Apeks XT50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks XT50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks XT50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible

\$729.00

Scubapro MK19 EVO/G260 Regulator

If you dive deep, dive cold, or often find yourself on silty bottoms or in less-than-pristine waters, the MK19 EVO/G260 is the regulator system for you. The new MK19 EVO is Scubapro's premium high performance balanced diaphragm first stage. Engineered specifically for cold water and harsh environments. Its internal components are completely sealed off from the elements so neither water nor pollution can get inside the chrome-plated marine grade brass body to foul the mechanism. This total sealing system also allows for a dry ambient pressure chamber which works to prevent freezing, provides better protection and improves performance, ensuring trouble-free operation no matter how cold or murky the water gets. Now think about it, if this regulator performance flawlessly in cold water it will also be a phenomenal regulator in warm temperate waters. This is just simply a great regulator at a great value.

IN STOCK \$919.00

Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the internal mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.

PRICED RIGHT AT \$579.00

MK11/S270 Dive Regulator

Overview

For divers seeking reliable performance in an uncomplicated air delivery system, the MK11 / S270 is easy to use, compact and durable. The balanced diaphragm MK11 delivers effortless airflow unaffected by depth, tank pressure or breathing rate. The compact S270 provides smooth breathing performance in a bulletproof anti-scratch design that's able to handle years of hard use.
