

THANKS TO THE WICHITA FIRE DEPARTMENT RESCUE TEAM FOR REPRESENTING AMBER WAVES DIVING. CHIEF AND AMBER WAVES DIVING INSTRUCTOR CHAD WINTON ALONG WITH DIVE MASTERS SHAWN HAYES, CHRIS WIRTHS, AND JON JARVIS DID A GREAT JOB GETTING THESE BRAVE MEN AND WOMEN SCUBA CERTIFIED.

TYLER MORAND PADI OPEN WATER DIVER  
 AVERY MORAND PADI OPEN WATER DIVER  
 CAMERON MORAND PADI OPEN WATER DIVER

MICHAEL SMITH PADI OPEN WATER DIVER  
 PAUL RIGGAN PADI OPEN WATER DIVER  
 DUSTIN SMITH PADI OPEN WATER DIVER

GINEVIEVE DAVISON PADI OPEN WATER DIVER  
 HAYDEN DAVISON PADI OPEN WATER DIVER  
 RYAN HODGE PADI PEAK PERFORMANCE BUOYANCY SPECIALTY

DR. SCUBA DID A PRIVATE LESSON THIS PAST WEEKEND. WE WELCOME ANNA TILLISON AS A NEW PADI OPEN WATER DIVER.

INSTRUCTORS NEIL GARRETT AND BRIAN HARVEY ALONG WITH DIVE MASTER MITCH LOWRY HAD A BUSY WEEKEND AT BEAVER LAKE. SUCCESS AND FUN WAS HAD BY THESE NEW DIVERS. WELCOME TO THE SPORT OF SCUBA.

### Wichita CPR Training

Provided by Amber Waves Diving Company

WICHITACPR TRAINING Center can provide you training in Emergency First Responder, American Heart Association, American Safety and Health Institute, and the National Safety Council. Our Instructors have real world experience in providing first aid care and will provide you a 'real life' training experience. We also sell every brand of AEDs.

Call 316-775-6688 to schedule your class

PICTURED ABOVE IS OUR SUNDAY FIRST AID GRADUATES. WE HAD A LOT OF FUN LEARNING LIFE SAVING SKILLS.

Amber Waves Diving has teamed with Sunscape Resorts and Ocean Encounters to bring you a great trip to CURACAO JAN 21-28, 2023

Deluxe Garden View Dbl - \$2,930 Single - \$3,635  
 Deluxe Ocean View - Dbl - \$2,990 Single \$3,730  
 Sun Club Ocean View - Dbl \$3,225 Single \$4,100  
 Sun Club Premium Deluxe Ocean Front - Dbl \$3,260 Single \$4,165  
 \*Non-diver rates subtract \$600

Rates are per person based on 7 nights at Sunscape Curaçao Resort, Spa & Casino and includes airfare from Wichita, all meals & drinks (including alcohol), 5 days of 2 tank boat diving, unlimited air, airport transfers and all taxes. Rates Based on Cash or Check Discount

### TRAINING AT BEAVER LAKE ARKANSAS

Beaver Lake is a man-made reservoir in the Ozark Mountains of Northwest Arkansas and is formed by a dam across the White River only a few hours drive from Wichita. Beaver Lake waters are deep, clean, and clear. Beaver Lake is optimal for scuba diving because the water is deep and visibility is great making for interesting sites.

COME JOIN US FOR A WEEKEND OF FUN

#### BEAVER LAKE SCHEDULE

SEPT 30- OCT 2 OPEN WATER, ADVANCED, AND SPECIALTY SCUBA CLASSES

**SCUBA SEASON IS CLOSING SOON, DON'T MISS OUT ON GETTING CERTIFIED IN 2022.**

**SIGN UP NOW 316-775-6688**

### PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, planning, and organization of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

**FINISH THE DIVE SEASON OFF WITH A GREAT CERTIFICATION. YOU WILL BE ABLE TO ENJOY NEW DIVE SITES AND SEE NEW MARINE LIFE.**

## ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience to complete their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

**Why should you take the Advanced Open Water Course?**

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

### ENRICHED AIR CLASS

FORMING NOW...CALL 316-775-6688

### ENRICHED AIR—NITROX

There are many benefits to using nitrox while scuba diving, as well as risks and considerations for nitrox use. Personally, I feel the benefits far outweigh the risks, and use nitrox every chance that I get!

#### 1. Longer Bottom Times

Recreational nitrox (21 - 40% oxygen) contains a lower percentage of nitrogen than air. The reduced percentage of nitrogen in recreational nitrox allows divers to extend their no-decompression limits by reducing nitrogen absorption. For example, according to the NOAA (National Oceanographic and Atmospheric Association) no-decompression dive tables, a diver using Nitrox 36 (or NOAA Nitrox II) may stay up to 50 minutes at 90 feet of sea water, while a diver using air may only stay a maximum of 30 minutes at this depth.

#### 2. Shorter Surface Intervals

A diver using nitrox absorbs less nitrogen on a given dive than one who uses air. This means that the nitrox diver has less nitrogen to off-gas during the surface interval, which can shorten the required surface interval drastically. For example, a diver using Nitrox 32 can repeat a 50 minute dive to 60 feet after 41 minutes, while a diver using air must wait a minimum of 8 hours to repeat the same dive (using NOAA's no decompression dive tables).

#### 3. Longer Repetitive Dive Times

Nitrox becomes especially useful for divers who engage in more than one dive per day. A diver using nitrox will have a longer allowable bottom time on a repetitive dive than a diver using air because the diver using nitrox has absorbed less nitrogen.

#### 4. Exhaustion

Many divers claim to feel less exhausted after a dive on nitrox than after a comparable dive on air. By reducing a diver's nitrogen absorption, nitrox may also reduce a diver's post-dive exhaustion. This is not a proven fact, but enough divers claim to feel this effect that it is definitely a consideration.

#### 5. Shorter Decompression

Technical divers use nitrox to reduce decompression requirements. If nitrox is used throughout the dive, the diver may require shorter or fewer decompression stops. If nitrox is used as a decompression gas (the diver only breathes nitrox during the decompression stops), the decompression stops will be shorter.

### EQUIPMENT SPECIALIST DIVER

OPEN ENROLLMENT JUST CALL AND SCHEDULE

### PADI EQUIPMENT SPECIALTY COURSE...IS IT WORTH IT?

Don't miss a dive due to a scuba gear issue. Whether it's a blown O-ring, regulator problem, wetsuit tear or a broken fin strap, you can learn how to manage basic scuba equipment adjustments.

As a PADI Equipment Specialist, you are prepared for the basic scuba equipment maintenance, care and adjustments you'll encounter every day. In addition, you'll learn interesting background information about how your gear works, how it's repair and other information that helps you with your equipment investment.

Additionally, if you don't already have your PADI Advanced Certification, this course counts as one of your dives. More importantly this course counts toward a specialty needed for your Master Scuba Diver Certification.

PADI Equipment Specialty - How does it work?

To enroll in the PADI Equipment Specialty course in Bali, you must be a PADI Scuba Diver (or qualifying certification from another organization). No dives are required, so you can take the Equipment Specialty course any time of the year.

With the PADI equipment specialty course you will come to our dive center where our Instructor will go through the following with you:

- Review the theory, principles and operation of scuba diving equipment
- Learn about routine, recommended care and maintenance procedures, and equipment storage
- How to overcome common problems with equipment and recommended professional maintenance procedures (may include a demonstration of repair procedures).
- Gain simple suggestions for comfortable equipment configurations and an introduction to new gear (may include optional confined water dive to try new or unfamiliar equipment).

PADI Equipment Specialty - Where will I dive?

The PADI Equipment Specialty course is a non-diving specialty course which means that there are no dives included in the course.

### Scubapro MK11/C370 Regulator

The MK11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.

**PRICED RIGHT AT \$579.00**
