GEARING UP FOR DIVE SEASON WITH A BIG PART ONE CLASS. THANKS TO INSTRUCTORS WENDY AND BLAINE GARRETT ALONG WITH DIVE MASTER KRISTINA AND RON SEBOR FOR A JOB WELL DONE

SUNDAY FIRST AID FUN.

TRAINING AT BEAVER LAKE ARKANSAS

Beaver Lake is a man-made reservoir in the Ozark Mountains of Northwest Arkansas and is formed by a dam across the White River only a few hours drive from Wichita. Beaver Lake waters are deep, clean, and clear. Beaver Lake is optimal for scuba diving because the water is deep and visibility is great making for interesting sites. JOIN US TO FINISH YOUR CERTIFICATION!

ENRICHED AIR CLASS

WE CUSTOMIZE THE SCHEDULE JUST FOR YOU

AMBER WAVES DIVING REPAIR CENTER

Properly functioning gear is crucial
Your safety depends on it. That's why we are the best technicians in the business to service your gear.

What to expect

We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk paying OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation Dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

WHY YOU SHOULD BUY GEAR

Scuba diving, like many recreational activities, is equipment intensive. Recreational diving has grown from an obscure sport practiced by a small band of youthful and athletic adventurers into an activity enjoyed by millions around the world in all kinds of water. Increasingly sophisticated and reliable equipment, and the training to use it properly, are largely responsible for that growth.

Whether an item of dive gear is considered essential or desirable, each was conceived and developed to satisfy a definite need and perform a specific function. From regulator to gauges, mask to fins, and buoyancy compensator to wet suit, recreational scuba equipment is purposeful, interesting to use, and a big contributor to the overall fascination and attraction of diving.

Acquiring your own dive equipment is a major factor in the enjoyment of the sport. Sure, you can rent gear at many dive destinations, but do you really want to rely on the availability of much-used rental equipment for your personal safety and enjoyment of diving?

Owning your own dive gear has many advantages. As a beginning Open Water certification student, you can speed your learning curve and progress quickly into the open-water environment by purchasing and using a basic dive equipment package — regulator and BC in addition to mask, snorkel, and fins. Learning how to scuba dive involves a lot more than learning how to breathe through a regulator underwater. You learn the art of buoyancy control, the subtleties of swimming and streamlining, and a host of other skills. Acquiring these skills quickly and comfortably has a lot to do with the equipment you use in training. If the BC is too small, you will struggle with it, which interferes with your learning. Fit and comfort are the prime criteria in selecting most items of dive gear, and in achieving maximum safety and pleasure underwater. The best way to ensure that your gear fits correctly and comfortably is to wear your own.

Even if loaner or rental equipment fits well, it may not be right for you because of particular features - or lack of them. Features are what distinguish one item of dive gear from another. When you buy your own gear, you evaluate and choose the features you need and appreciate. The process is fun, adds greatly to your knowledge of diving, and ensures that the gear you dive with does what you want it to. The way you want it to.

You will know how to operate it properly and care for it responsibly. You will know the condition of your gear, where it has been, and who has been using it. That familiarity contributes to the highest level of safety, which in turn gives you peace of mind. Other less obvious but still important benefits accrue from owning dive gear. Buying gear keeps your relationship with your dive shop. That shop is your conduit to diving. It offers training opportunities, arranges trips, deepens your connection with other divers, and services and supports your equipment. Having your own equipment also marks you as a serious, committed diver, and it encourages you to dive regularly, to stay involved in the sport.

The bottom line on equipment ownership: It's the way to achieve maximum enjoyment of diving. Part of the commitment you are making to dive should include acquiring your own dive gear. It's an excellent investment in yourself and in your future diving adventures.

Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally benign so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.

PRICED RIGHT AT \$639.00

AQUALUNG HELIX PRO REGULATOR

\$549.00

This 2022 Aqualung presents us with the Helix, a mid-priced regulator, which enjoys very good performance, undoubtedly above expectations.

It represents the DNA of the Aqualung regulators. It is without question the best option in terms of value for money currently available.

The Helix Pro version has two added features:

- Aqualung's patented ACD system, which protects the first stage from accidental entry of water or dirt even when the regulator is not under pressure.
- And sealed ambient pressure chamber, suitable for cold and/or polluted waters.

Scubapro MK17 EVO/G260 Regulator

If you dive deep, dive cold, or often find yourself on silty bottoms or in less-than-pristine waters, the MK17 EVO/G260 is the regulator system for you. The new MK17 EVO is Scubapro's premium high performance balanced diaphragm first stage. Engineered specifically for cold water and harsh environments, its internal components are completely sealed off from the elements so neither water nor pollution can get inside the chrome-plated marine grade brass body to foul the mechanism.

This is considered the work-horse for Public Safety and TEC Divers, but why should they get the good stuff when you deserve the best.

\$928

apeks AQUALUNG

The Apeks XTX50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks XTX50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks XTX50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible

\$720.00
