JOHN 3:16

THIS IS SUCH A FINE TIME OF YEAR, ESPECIALLY WHEN THE COSMOSPHERE SUMMER CAMPS BEGIN. THANKS TO INSTRUCTORS BLAINE GARRETT AND ROYCE TAYLOR ALONG WITH DIVE MASTER JAMES PHILLIPS FOR COORDINATING AND EXECUTING A GREAT DAY OF FUN BLOWING BUBBLES WITH THESE YOUNG PEOPLE.

A POOL AND CLASSROOM SCUBA WEEKEND WAS A GREAT SUCCESS DUE TO THE EFFORTS OF INSTRUCTOR BLAINE AND WENDY GARRETT ALONG WITH DIVE MASTERS ANGELA PIRNER AND PATRICK MORRE

ANOTHER SUNDAY FUNDAY OF FIRST AID TRAINING.

### AMBER WAVES DIVING REPAIR CENTER

Properly functioning gear is crucial  
Your safety depends on it. That's why we are the best technicians in the business to service your gear.

#### What to expect

We are certified technicians that always follow manufacturer guidelines. conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

WICHITA METRO SCUBA HEADQUARTERS

### ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

#### Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

MORE PROGRESS BEING COMPLETED ON THE NEW 'DIGS.' WE ARE HOPING, WITH FINGERS CROSSED, FOR AN OCTOBER OPENING

### RESCUE CLASS FORMING

CALL AND SCHEDULE YOUR CLASSROOM SESSIONS SO THAT WE ARE READY FOR THE POOL AND LAKE WHEN IT WARMS UP. 316-775-6688

### PADI UNDERWATER NAVIGATOR

#### Who should take this course?

Be the scuba diver everyone wants to follow because you know where you are and where you're going. The PADI Underwater Navigator course fine-tunes your observation skills and teaches you to more accurately use your compass underwater. If you like challenges with big rewards, take this course and have fun finding your way.

If you're a PADI (Junior) Open Water Diver who is at least 10 years old, a PADI can enroll in the PADI Underwater Navigator Specialty course.

#### WATCH THIS VIDEO ON NAVIGATION

#### Who should take this course?

The thought of dipping below the surface seems mysterious, yet so alluring. Although you've been scuba diving at a site many times before, at night you drop into a whole new world and watch it come to life under the glow of your dive light. The scene changes as day creatures and nocturnal organisms emerge. If you've wondered what happens underwater after the sun goes down, sign up for the PADI Night Diver Specialty course.

### PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, planning, organization, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

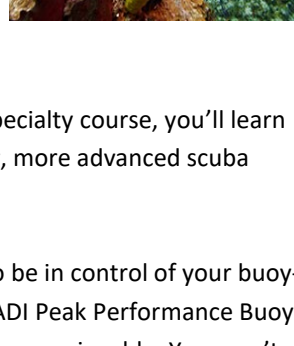

### OUR GROUP ON THE CAT PPALLU ARRIVING BACK IN PORT AFTER A WEEK OF DIVING

### PADI Peak Performance Buoyancy Specialty Course

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

In the PADI Peak Performance Buoyancy specialty course, you'll learn important skills that will make you a better, more advanced scuba diver.

Overall, this specialty will teach you how to be in control of your buoyancy while in the water. After taking the PADI Peak Performance Buoyancy specialty course, diving will become more enjoyable. You won't have to spend as much time trying to stay on the right path, because you will finally be able to move effortlessly through the water like the divers you have envied in the past. With more buoyancy control, you can take more time to enjoy your surroundings and the unique sights underwater.

Becoming neutrally buoyant doesn't just benefit you. It also benefits the underwater world. When you are able to ascend, descend or hover easily with full control, you'll have less impact on the underwater environment.

### PADI Search & Recovery Certification Course

It's been a good dive in less than optimal visibility. You and your buddy are making your way over to the boat when you hear a splash. "My mask!" The trail of small bubbles quickly disappears in the moderate current as John's locker claims another piece of scuba gear. A diver in the water behind you says, "Hey, I have plenty of air. I'll go get it." The distraught diver on the boat calls down, "In this current and viz, it could be anywhere by now!"

"No problem!" And with that the salvage is on. About 5 minutes later our hero resurfaces, mask in hand. How are some divers able to find things so easily? It's all about the course. The PADI Search And Recovery Specialty will give you the skills and confidence to be able to find submerged objects and safely bring them to the surface. Your instructor will guide you in the procedures and techniques for organizing a search, utilizing effective underwater search patterns, and how to properly and safely use lift devices (pictured.) You'll also learn how to defeat the problems posed by limited visibility as you practice low-viz scenarios.
