JOHN HAD A BUSY WEEK-  
END BECAUSE HE ALSO  
COMPLETED HIS PADI  
ENRICHED AIR COURSE

BIG THANKS TO IDC INSTRUCTOR CHRIS HULETT AND INSTRUCTOR SUSAN HULETT FOR COORDINATING A RESCUE CLASS AND GETTING JOHN REHARD TRAINED

ROATAN  
TURQUOISE BAY RESORT  
FEBRUARY 17-24, 2024

DIVER-DBL \$2,433.00  
DIVER-SINGLE \$2,592.00  
NON-DIVER DBL \$2,076.00  
OCEAN VIEW UPGRAGE \$207.00 PER ROOM PER WEEK

**Package Includes:**  
• Round trip airfare from Wichita  
• 7 nights' accommodation at Turquoise Bay Resort  
• Round-trip airport/hotel transfers  
• 3 full meals daily  
• Non alcoholic beverages & local alcoholic beverages  
• 3 boat dive trips daily including tanks, weights & weight belt  
• Horseback ride  
• Botanical garden tour  
• Wifi  
• All hotel taxes and service charges

**Package Excludes:**  
• Nitrox (\$119 + 19% tax for unlimited; if pre-paid)  
• Optional Chamber Fee of \$2.00 per person/day  
• Personal dive equipment  
• Tips to the Dive Crew  
• Trip Cancellation or Interruption Insurance

PRICED AT CASH DISCOUNT \$500 DEPOSIT

- SEPT 22-24 OPEN WATER PART ONE
- SEPT 23 DISCOVER SCUBA, SCUBA REVIEW COURSE, OR JUST COME AND PLAY
- SEPT 24 FIRST AID TRAINING
- SEPT 29-OCT 1 OPEN WATER PART TWO CLASS. INCLUDES ADVANCED AND SPECIALTY TRAINING AT BEAVER LAKE
- OCT 1 FIRST AID TRAINING
- OCT 6-8 OPEN WATER PART ONE COURSE
- OCT 7 DISCOVER SCUBA, SCUBA REVIEW COURSE, OR JUST COME AND PLAY
- OCT 8 FIRST AID TRAINING
- OCT 13-15 OPEN WATER PART TWO CLASS. INCLUDES ADVANCED AND SPECIALTY TRAINING AT BEAVER LAKE...WEATHER PERMITTING
- OCT 15 FIRST AID TRAINING
- OCT 20-22 OPEN WATER PART ONE COURSE
- OCT 23 DISCOVER SCUBA, SCUBA REVIEW COURSE, OR JUST COME AND PLAY
- OCT 22 FIRST AID TRAINING
- NOV 3-5 OPEN WATER PART ONE COURSE
- NOV 4 DISCOVER SCUBA, SCUBA REVIEW COURSE, OR JUST COME AND PLAY
- NOV 5 FIRST AID TRAINING
- NOV 10-12 OPEN WATER PART ONE COURSE
- NOV 11 DISCOVER SCUBA, SCUBA REVIEW COURSE, OR JUST COME AND PLAY
- NOV 12 FIRST AID TRAINING

MAKE EVERY WEEKEND A DIVE WEEKEND

**Wichita CPR Training**  
Provided by Amber Waves Diving Company

WICHITACPRTRAINING Center can provide you training in Emergency First Responder, American Heart Association, American Safety and Health Institute, and the National Safety Council. Our Instructors have real world experience in providing first aid care and will provide you a 'real life' training experience.

We also sell every brand of AEDs.

Call 316-775-6688 to schedule your class

AMBER WAVES DIVING AND AQUATIC CENTER IS NOW RECRUITING FOR AN AQUATICS COORDINATOR/DIRECTOR AND SWIM INSTRUCTORS. THESE POSITIONS WILL BE RESPONSIBLE FOR OUR SWIM AND AQUATIC PROGRAMMING. YOU CAN INQUIRE BY CALLING 316-775-6688 AND OR EMAILING TYLER@AMBERWAVEDIVING.COM

**PADI Equipment Specialist**

PADI EQUIPMENT SPECIALTY COURSE...IS IT WORTH IT?

Don't miss a dive due to a scuba gear issue. Whether it's a blown O-ring, regulator problem, wetsuit tear or a broken fin strap, you can learn how to manage basic scuba equipment adjustments.

As a PADI Equipment Specialist, you are prepared for the basic scuba equipment maintenance, care and adjustments you'll encounter every day. In addition, you'll learn interesting background information about how your gear works, how it's repair and other information that helps you with your equipment investment.

Additionally, if you don't already have your PADI Advanced Certification, this course counts as one of your dives. More importantly this course counts toward a specialty needed for your Master Scuba Diver Certification.

PADI Equipment Specialty - How does it work?

To enroll in the PADI Equipment specialty course in Bali, you must be a PADI Scuba Diver (or qualifying certification from another organization). No dives are required, so you can take the Equipment Specialist course any time of the year.

With the PADI equipment specialty course you will come to our dive center where our instructor will go through the following with you:

- Review the theory, principles and operation of scuba diving equipment
- Learn about routine, recommended care and maintenance procedures, and equipment storage
- How to overcome common problems with equipment and recommended professional maintenance procedures (may include a demonstration of repair procedures).
- Gain simple suggestions for comfortable equipment configurations and an introduction to new gear (may include optional confined water dive to try new or unfamiliar equipment).

PADI Equipment Specialty - Where will I dive?

The PADI Equipment Specialty course is a non-diving specialty course which means that there are no dives included in the course.

**WHY DIVE NITROX?**

- Longer Bottom Times:** Recreational nitrox (21 - 40% oxygen) contains a lower percentage of nitrogen than air. The reduced percentage of nitrogen in recreational nitrox allows divers to extend their no-decompression limits (or dive time) by reducing nitrogen absorption - the less nitrogen there is in a diver's breathing gas, the slower his nitrogen absorption will be at a given depth. For example, according to the NOAA (National Oceanographic and Atmospheric Association) no-decompression dive tables, a diver using Nitrox 36 (or NOAA Nitrox II) may stay up to 50 minutes at 90 feet of sea water, while a diver using air may only stay a maximum of 30 minutes at this depth.
- Shorter Surface Intervals:** A diver using nitrox absorbs less nitrogen for a given depth and dive time than a diver using air. This means that the nitrox diver has less nitrogen to off-gas during a surface interval, which can shorten the required surface interval drastically. For example, a diver using Nitrox 32 (NOAA Nitrox I) can repeat a 50 minute dive to 60 feet after 41 minutes, while a diver using air must wait a minimum of 8 hours to repeat the same dive (using NOAA's no decompression dive tables).
- Longer Repetitive Dive Times:** Nitrox becomes especially useful for divers who engage in more than one dive per day. A diver using nitrox will have a longer allowable bottom time on a repetitive dive than a diver using air because the diver using nitrox has absorbed less nitrogen. For example, after a dive to 70 feet for 30 minutes, a diver using Nitrox 32 can stay at 70 feet for a maximum of 24 minutes if he immediately reenters the water. However, a diver performing the same series of dives on air may only stay at 70 feet for 19 minutes on his second dive (according to NOAA's no decompression dive tables).
- Reduced Exhaustion:** Many divers claim to feel less exhausted after a dive on nitrox than after a comparable dive on air. By reducing a diver's nitrogen absorption, nitrox may also reduce a diver's post-dive exhaustion.
- Shorter Decompression:** Technical divers use nitrox to reduce decompression requirements. If nitrox is used throughout the dive, the nitrox may require shorter or fewer decompression stops. If nitrox is used as a second gas (the diver only breathes nitrox during the decompression stops), the decompression stops will be shorter.

**AMBER WAVES DIVING REPAIR CENTER**

Properly functioning gear is crucial  
Your safety depends on it. That's why we are the best technicians in the business to service your gear.

**What to expect**

We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

**SCUBAPRO MK19 EVO/G260 REGULATOR**

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.

**\$999.00**

**APEKS AQUA LUNG**

The Apeks GTX50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks GTX50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks GTX50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible

**\$720.00**

**SHERWOOD SCUBA**

**WISDOM 3 COMPUTER**

The new Wisdom 3 is an intuitive easy to use and operate with easy to read large digital display. The computer has diver selectable alarms, deep stop reminders, DECO warnings, and has Air, Nitrox and Gauge Modes. The repetitive dive planning mode uses information from previous dives to see limitations of your next dive. Logging your dives is made easy with the dive log function that stores profiles for later recall and viewing.

**RETAIL \$945 ...OUR PRICE \$825**

**AQUALUNG**

**HELIX PRO REGULATOR \$549.00**

This 2022 Aqualung presents us with the Helix, a mid-priced regulator, which enjoys very good performance, undoubtedly above expectations. It represents the DNA of the Aqualung regulators. It is without Question the best option in terms of value for money currently available.

The Helix Pro regulator has two added features:

Aqualung's patented ACD system, technology that protects the first stage from accidental entry of water or dirt even when the regulator is not under pressure.

And sealed ambient pressure chamber, suitable for cold and/or polluted waters.

**Scubapro MK11/C370 Regulator**

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.
