FUN IN OUR WARM POOL WITH DISCOVER AND REFRESHER STUDENTS. A BIG THANKS TO INSTRUCTOR GARY HEAD AND DIVE MASTER PATRICK MOORE FOR HELPING WITH THE FUN

STEVEN DONNENWERTH FINISHED THE PADI ENRICHED COURSE THIS PAST WEEK AND IS READY TO USE IT ON HIS TRIP TO THE ISLANDS.

PADI DISCOVER SCUBA

SCUBA REVIEW—OR JUST COME AND PLAY

AMBER WAVES DIVING AQUATIC CENTER POOL

SATURDAY JANUARY 13, 2023

Why PADI Scuba Review?

Are you a certified diver, but haven't been in the water lately? Are you looking to refresh your dive skills and knowledge? Are you a PADI Scuba Diver and want to earn your PADI Open Water Diver certification? If you answered yes to any of these questions then PADI Scuba Review is for you.

What do I need to start?

Hold a scuba certification
Minimum age: 10 years old

What will I do?

First, you'll review the safety information you learned during your initial training. Then, you head to the pool to practice some of the fundamental scuba skills

How long will it take?

A couple of hours

What will I need?

If you don't have your own gear you will need to rent gear.

I don't want a review, but I want to play?

No problem. Just sign up and come play in the pool for a couple of hours....we want you diving!

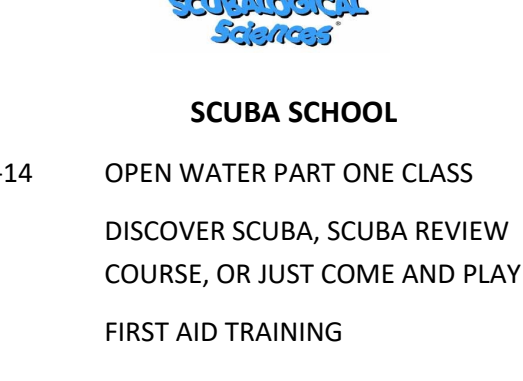

- \$100.00 for a Refresher (includes instructor fee, gear rental and pool fee)
- Just want to play but you don't have gear \$25.00 pool fee and Full gear rental 50% off. Total \$50 plus tax
- Have all your gear but just want to play? \$25.00

STARTS AT NOON

Curriculum

The innovative and learner-focused curriculum uses an "ages and stages" format so that you can offer swim lessons across the lifespan to a broad range of interests. You choose the programs to offer that are best suited to your situation and needs.

The Starfish Swim School program for pre-school, youth and adult students develops a foundation of swimming and safety skills with a focus on self-rescue: trust and submersion body positions and air recovery (includes rollover to back for air recovery) forward movement and direction change rotary movement (transitions from rollover to side position for air recovery) integrated movement age-appropriate safety skills such as asking permission, wearing a lifejacket, using flotation to make an assist, treading water, and survival float.

The Starfish Stroke School for youth and adult students develops effective swim technique and endurance for:

- Freestyle
- Backstroke
- Butterfly
- Breaststroke

Star Fun & Fitness provides eight different activity templates for scouts, homeschoolers, birthday parties, camps, after-school care, and school groups. The activities range from water safety through fitness training - with everything aquatic in between! There is also a water safety classroom presentation for outreach efforts.

Safety Training and Aquatic Rescue (STAR) is a practical and effective community water safety course that can be customized to the needs of the audience. The training is ideal training for parents/caregivers, child care personnel, foster families, and anyone who supervises or may have to help others in, on or near the water. STAR may be provided completely in person by your staff, or you can purchase online courses for distribution to your audience and provide an online or blended course.

We are working towards the goal of also being an "Aquatic-Fitness Center." We hope to offer water aerobics, water walking programs, arthritis aquatic exercise, along with many more similar programs.

Wichita CPR Training
Provided by Amber Waves Diving Company

WICHITACPRTRAINING Center can provide you training in Emergency First Responder, American Heart Association, American Safety and Health Institute, and the National Safety Council. Our Instructors have real world experience in providing first aid care and will provide you a 'real life' training experience. We also sell every brand of AEDs.

2024 WILL BE A GREAT DIVE YEAR

Every year around this time a lot of people set many goals for the next year. "Lose 20 pounds", "get a new job", "buy a house", "get married", and so on. But us divers are different! Our goals tend to revolve around diving, and there is nothing wrong with that!

CURACAO

Check out our list of EIGHT New Year's Resolutions that can help you become a better, more diverse diver, dive buddy, and ocean lover in 2020!

- Do better with air consumption:** Not only does this help you become a better diver and let you extend your dives, but it also helps your buddy as well so that they do not have to end their dive with 1,200 PSI left because you have already gone through your air. But how do you do this? Besides just diving more (i.e. practice), being more fit and having better overall health can certainly help you as you can better control your breathing rate. Join us during the winter while we're at the pool. You get exercise and can hone your buoyancy skills. Another BIG factor in air consumption is the regulator you use. That's correct, the newer models are better engineered and offer system (s) that correct for depth and other factors. Additionally, is your regular well maintained?
- Check out a new local dive site:** No matter if you live in a landlocked state with a few lakes or rivers nearby, on the coast in Florida, or on a warm exotic island somewhere, a lot of divers can become bored of diving the same sites over and over. Go check out somewhere new! Many of you won't venture out to Beaver Lake with us. Why? It has great diving and beautiful scenery. Trust me on this, WE MAKE IT FUN!
- Take a dive trip somewhere new:** If you have the means to travel, by all means do it! Whether it is a quick 2 hour drive, a 2 hour flight, or even a 20 hour flight, check somewhere off your bucket list! We are going on a live-a-board in the Caymans in late February and early March. We then plan to go to Key Largo, and of course Curacao. Watch our newsletters for these great trips.
- Buy a new piece of dive gear, or upgrade something old:** The dive industry is constantly progressing, which means all sorts of dive gear manufacturers are always coming out with the latest and greatest technology updates to their previous products. Treat yourself to something new! Or if you are still renting some pieces of equipment, a tank, a BCD, etc., why not get your own?
- Take a new specialty:** Don't limit what dives you can do because you don't think you will ever be somewhere that it is necessary. You never know what opportunities will present themselves, and you don't want to have to pass up a great dive trip just because you do not have the right credentials. Have you been fascinated with DPV's (Diver Propulsion Vehicles) and wanted to try one? Take the class! Have you been wanting to check out "Full Face Mask with communications." We can get that done for you.
- Get your gear serviced:** Don't risk being on a boat, gearing up, and then realizing you have a leaky hose and have to cancel your dive. Especially if you have not used your gear in an extended period of time, bring it into our Repair Department to have it serviced. Remember, dive gear will last a long time as long as you take care of it, so if you do not want to replace it all right away, keep on a regular service schedule.
- Buddy up with an excited new diver and show them the ropes:** Do you remember how excited you were right after you received your Open Water Certification? There are new divers certified every day, and a lot of them have no idea what to do next, and may not have a buddy. You were there once, so stay involved in the Amber Waves Diving Club. Club, you say? Yep, we have divers hanging around, coming on trips with us, and helping out. We encourage them to be part of the shop, so that you can meet a "new" dive buddy.
- Buddy up with a more experienced diver and learn from them:** Even the all-time greats in every sport or activity can always learn something new. Reach out and find a diver who is more experienced than you, especially in your local area, and invite them on a dive. You won't believe some of the stories and possibly some of the new knowledge and tips you can learn!

IN 2024 WE SAY, "Before you can make a dream come true, you must first have one."

A BUILDING IS JUST A BUILDING UNLESS YOU HAVE WONDERFUL PEOPLE TO FILL IT, THEN IT BECOMES A HOME. WE HELD OUR ANNUAL 'GET READY' EMPLOYEE MEETING THIS WEEK. WE ARE CERTAINLY BLESSED TO HAVE THE BEST IN THE BUSINESS

AMBER WAVES DIVING REPAIR CENTER

Properly functioning gear is crucial
Your safety depends on it. That's why we are the best technicians in the business to service your gear.

What to expect

We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out worn or damaged. We want your next dive to be your best dive!

PADI Equipment Specialist

PADI EQUIPMENT SPECIALTY COURSE...IS IT WORTH IT?

Don't miss a dive due to a scuba gear issue. Whether it's a blown O-ring, regulator problem, wetsuit tear or a broken fin strap, you can learn how to manage basic scuba equipment adjustments.

As a PADI Equipment Specialist, you are prepared for the basic scuba equipment maintenance, care and adjustments you'll encounter every day. In addition, you'll learn interesting background information about how your gear works, how it's repair and other information that helps you with your equipment investment.

Additionally, if you don't already have your PADI Advanced Certification, this course counts as one of your dives. More importantly this course counts toward a specialty needed for your Master Scuba Diver Certification.

PADI Equipment Specialty - How does it work?

To enroll in the PADI Equipment specialty course in Bali, you must be a PADI Scuba Diver (or qualifying certification from another organization). No dives are required, so you can take the Equipment Specialist course any time of the year.

With the PADI equipment specialty course you will come to your dive center where our Instructor will go through the following with you:

- Review the theory, principles and operation of scuba diving equipment
- Learn about routine, recommended care and maintenance procedures, and equipment storage
- How to overcome common problems with equipment and recommended professional maintenance procedures (may include a demonstration of repair procedures).
- Gain simple suggestions for comfortable equipment configurations and an introduction to new gear (may include optional confined water dive to try new or unfamiliar equipment).

PADI Equipment Specialty - Where will I dive?

The PADI Equipment Specialty course is a non-diving specialty course which means that there are no dives included in the course.

SCUBAPRO MK19 EVO/G260 REGULATOR

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SULPHUR ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.

Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.
