### PADI DISCOVER SCUBA

**SCUBA REVIEW—OR JUST COME AND PLAY**  
**AMBER WAVES DIVING AQUATIC CENTER POOL**  
**SATURDAY FEBRUARY 10, 2023**

#### Why PADI Scuba Review?

Are you a certified diver, but haven't been in the water lately? Are you looking to refresh your dive skills and knowledge? Are you a PADI Scuba Diver and want to earn your PADI Open Water Diver certification? If you answered yes to any of these questions then PADI Scuba Review is for you.

#### What do I need to start?

Hold a scuba certification  
Minimum age: 10 years old

#### What will I do?

First, you'll review the safety information you learned during your initial training. Then, you head to the pool to practice some of the fundamental scuba skills

#### How long will it take?

A couple of hours

#### What will I need?

If you don't have your own gear you will need to rent gear.

#### I don't want a review, but I want to play?

No problem. Just sign up and come play in the pool for a couple of hours....we want you diving!

- \$100.00 for a Refresher (includes instructor fee, gear rental and pool fee)
- Just want to play but you don't have gear \$25.00 pool fee and Full gear rental 50% off. Total \$50 plus tax
- Have all your gear but just want to play? \$25.00

**STARTS AT NOON**

**CALL TO RESERVE YOUR SPOT**

**Once Again, We're Diving You Crazy!**

Join us June 8-15 2024 in Belize  
Sunbreeze Hotel in Ambergris Caye.

**Diver Double Occupancy \$2,642\***  
**Diver Single Occupancy \$3,292\***  
**Non-Diver Sharing with Diver \$2,229\***

#### Package Includes:

- All roundtrip airfare
- 7 nights deluxe accommodation
- Room tax and service charge
- 3 days of 2 tank local boat dives
- 2 days of 3 tank local boat dives
- American breakfast daily

#### Package Excludes:

- Blue Hole Excursion
- Departure tax due upon departure
- Meals & Beverages not mentioned
- Additional Dives
- Personal dive equipment
- Gratuities
- Travel & Dive Insurance

\$500 non-refundable deposit will reserve your space.  
\*Prices based on cash payment, add 4% for credit card.

**MAKE EVERY WEEKEND A DIVE WEEKEND**

Want an Easy Specialty...to start your way towards becoming an Advanced or Master Suba Diver?

**WE JUST MADE IT EASIER!!!**

### PADI ENRICHED AIR SPECIALISTS

No Diving is Required...just sit back in a warm classroom and get your specialty. You will need to come in and pick up your learning materials so that you have your independent study done in time for class. Call today to reserve your spot.

### WHY DIVE NITROX?

- Longer Bottom Times:** Recreational nitrox (21 - 40% oxygen) contains a lower percentage of nitrogen than air. The reduced percentage of nitrogen in recreational nitrox allows divers to extend their no-decompression limits (or dive time) by reducing nitrogen absorption – the less nitrogen there is in a diver's breathing gas, the slower his nitrogen absorption will be at a given depth. For example, according to the NOAA (National Oceanographic and Atmospheric Association) no-decompression dive tables, a diver using Nitrox 36 (or NOAA Nitrox II) may stay up to 50 minutes at 90 feet of sea water, while a diver using air may only stay a maximum of 30 minutes at this depth.
- Shorter Surface Intervals:** A diver using nitrox absorbs less nitrogen for a given depth and dive time than a diver using air. This means that the nitrox diver has less nitrogen to off-gas during a surface interval, which can shorten the required surface interval drastically. For example, a diver using Nitrox 32 (NOAA Nitrox I) can repeat a 50 minute dive to 60 feet after 41 minutes, while a diver using air must wait a minimum of 8 hours to repeat the same dive (using NOAA's no decompression dive tables).
- Longer Repetitive Dive Times:** Nitrox becomes especially useful for divers who engage in more than one dive per day. A diver using nitrox will have a longer allowable bottom time on a repetitive dive than a diver using air because the diver using nitrox has absorbed less nitrogen. For example, after a dive to 70 feet for 30 minutes, a diver using Nitrox 32 can stay at 70 feet for a maximum of 24 minutes if he immediately reenters the water. However, a diver performing the same series of dives on air may only stay at 70 feet for 19 minutes on his second dive (according to NOAA's no decompression dive tables).
- Reduced Exhaustion:** Many divers claim to feel less exhausted after a dive on nitrox than after a comparable dive on air. By reducing a diver's nitrogen absorption, nitrox may also reduce a diver's post-dive exhaustion.
- Shorter Decompression:** Technical divers use nitrox to reduce decompression requirements. If nitrox is used throughout the dive, the diver may require shorter or fewer decompression stops. If nitrox is used as a decompression gas (the diver only breathes nitrox during the decompression stops), the decompression stops will be shorter.

**WE WORK WITH YOUR SCHEDULE**

### PADI EQUIPMENT SPECIALTY COURSE...IS IT WORTH IT?

Don't miss a dive due to a scuba gear issue. Whether it's a blown O-ring, regulator problem, wetsuit tear or a broken fin strap, you can learn how to manage basic scuba equipment adjustments.

As a PADI Equipment Specialist, you are prepared for the basic scuba equipment maintenance, care and adjustments you'll encounter every day. In addition, you'll learn interesting background information about how your gear works, how it's repair and other information that helps you with your equipment investment.

Additionally, if you don't already have your PADI Advanced Certification, this course counts as one of your dives. More importantly this course counts toward a specialty needed for your Master Scuba Diver Certification.

#### PADI Equipment Specialty - How does it work?

To enroll in the PADI Equipment specialty course in Bali, you must be a PADI Scuba Diver (or qualifying certification from another organization). No dives are required, so you can take the Equipment Specialist course any time of the year.

With the PADI equipment specialty course you will come to our dive center where our Instructor will go through the following with you:

- Review the theory, principles and operation of scuba diving equipment
- Learn about routine, recommended care and maintenance procedures, and equipment storage
- How to overcome common problems with equipment and recommended professional maintenance procedures (may include a demonstration of repair procedures).
- Gain simple suggestions for comfortable equipment configurations and an introduction to new gear (may include optional confined water dive to try new or unfamiliar equipment).

#### PADI Equipment Specialty - Where will I dive?

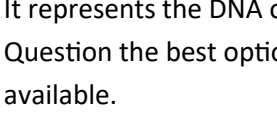

The PADI Equipment Specialty course is a non-diving specialty course which means that there are no dives included in the course.

## AQUALUNG®

### HELIX PRO REGULATOR

\$549.00

This 2022 Aqualung presents us with the Helix, a mid-priced regulator, which enjoys very good performance, undoubtedly above expectations.

It represents the DNA of the Aqualung regulators. It is without question the best option in terms of value for money currently available.

The Helix Pro version has two added features:

Aqualung's patented ACD system, technology that protects the first regulator is not under pressure.

And sealed ambient pressure chamber, suitable for cold and/or polluted waters.

Once you realize that you don't need a special occasion to buy a cake, the second part of your life begins.

## SCUBAPRO

INTRODUCING THE NEW GALILEO 3 (G3) DIVE

**Modern Watch Style**  
**Dive Computer. Classic Timepiece Look.**

With a vibrant color display for easy readability, the SCUBAPRO Galileo 3 (G3) is a modern watch-style dive computer with a classic timepiece look. Utilizing Galileo's trusted menu design and four button control, it's extremely intuitive to navigate through dive modes, two algorithm options, screen styles and other personalized dive management options.

Max Depth Heart Rate Surface Interval

### Scubapro MK11/C370 Regulator

The MK11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage gives you better breathing performance at greater depths.

**PRICED RIGHT AT \$643.00**

## SHERWOOD SCUBA

### WISDOM 3 COMPUTER

The new Wisdom 3 is an intuitive easy to use and operate with easy to read large digital display. The computer has diver selectable alarms, deep stop reminders, DECO warnings, and has Air, Nitrox and Gauge Modes.

**RETAIL \$945 ...OUR PRICE \$825**

## SCUBAPRO

SCUBAPRO MK19 EVO/G260 REGULATOR

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.
