AFTER MARCH 6 JUST TAKE \$1,000 OFF THE LISTED PRICE IN THE ADVERTISEMENT.

BELIZE

Belize is a democratic, English speaking nation, once known as British Honduras. The weather is mild, the beaches are beautiful, and the history is rich, this is a land of swaying palm trees and colorful sunsets.

From the beautiful beaches and azure waters of the Caribbean, to the Maya Mountains and the Pine Ridge, we have an adventure for everyone. Spectacular caves, winding waterfalls, virgin tropical rainforest, and hundreds of limestone caves make for exciting vistas. You will find many ancient Maya ruins and temples that will entice you to learn more of their history. Zip lining through the forest, taking nature walks, sailing the Caribbean, cave tubing through Maya caves, scuba diving and snorkeling the Barrier Reef, sailing the cayes, parasailing, or just hiking through the jungle, you will find a wonderful, unforgettable journey awaiting you. We are home to many beautiful resorts, jungle lodges, beach-front cabanas and hotels.

We also boast of an amazing coral reef system, the second largest in the world and this hemisphere's longest, running offshore, and many cayes (islands of coral sand) are surrounded by astounding reefs to snorkel or scuba dive. The reef lies one-half mile east of the Ambergris Caye shoreline and runs the entire 25 mile length of the island. This has made San Pedro Town the dive and water sports capital of our country as well as Central America. The Great Blue Hole, Turneffe Islands, Shark Ray Alley, Hol Chan Marine Reserve, Mexico Rocks, Lighthouse Reef, and many other diving areas are all only a short boat ride away from this coconut palm lined island.

PICTURED ABOVE IS OUR SUNDAY FIRST AID GRADUATING CLASS. THEY WERE A FUN GROUP OF LEARNERS.

MAKE EVERY WEEKEND A DIVE WEEKEND

AMBER WAVES DIVING REPAIR CENTER

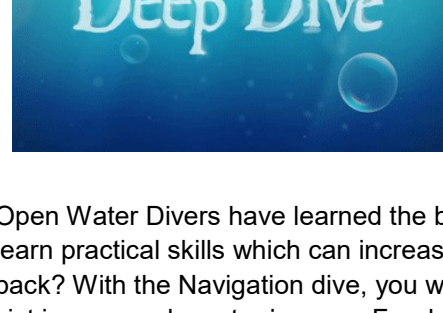

**Properly functioning gear is crucial
Your safety depends on it. That's why we are the best technicians in the business to service your gear.**

What to expect

We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

WHY YOU SHOULD BUY GEAR

Scuba diving, like many recreational activities, is equipment intensive. Recreational diving has grown from an obscure sport practiced by a small band of youthful and athletic adventurers into an activity enjoyed by millions around the world in all kinds of water. Increasingly sophisticated and reliable equipment, and the training to use it properly, are largely responsible for that growth.

Whether an item of dive gear is considered essential or desirable, each was conceived and developed to satisfy a definite need and perform a specific function. From regulator to gauges, mask to fins, and buoyancy compensator to wet suit, recreational scuba equipment is purposeful, interesting to use, and a big contributor to the overall fascination and attraction of diving.

Acquiring your own dive equipment is a major factor in the enjoyment of the sport. Sure, you can rent gear at many dive destinations, but do you really want to rely on the availability of much-used rental equipment for your personal safety and enjoyment of diving?

Owning your own dive gear has many advantages. As a beginning Open Water certification student, you can speed your learning curve and progress quickly into the open-water environment by purchasing and using a basic dive equipment package — regulator and BC in addition to mask, snorkel, and fins. Learning how to scuba dive involves a lot more than learning how to breathe through a regulator underwater. You learn the art of buoyancy control, the subtleties of swimming and streamlining, and a host of other skills. Acquiring these skills quickly and comfortably has a lot to do with the equipment you use in training. If the BC is too small, you will struggle with it, which interferes with your learning. Fit and comfort are the prime criteria in selecting most items of dive gear, and in achieving maximum safety and pleasure underwater. The best way to ensure that your gear fits correctly and comfortably is to wear your own.

Even if loaner or rental equipment fits well, it may not be right for you because of particular features - or lack of them. Features are what distinguish one item of dive gear from another. When you buy your own gear, you evaluate and choose the features you need and appreciate. The process is fun, adds greatly to your knowledge of diving, and ensures that the gear you dive with does what you want it to, the way you want it to.

You will know how to operate it properly and care for it responsibly. You will know the condition of your gear, where it has been, and who has been using it. That familiarity contributes to the highest level of safety, which in turn gives you peace of mind.

Other less obvious but still important benefits accrue from owning dive gear. Buying gear deepens your relationship with your dive shop. That shop is your conduit to diving. It offers training opportunities, arranges trips, keeps you in contact with other divers, and services and supports your equipment. Having your own equipment also marks you as a serious, committed diver, and it encourages you to dive regularly, to stay involved in the sport.

SHERWOOD SCUBA®

WISDOM 3 COMPUTER

The new Wisdom 3 is an intuitive easy to use and operate with easy to read large digital display. The computer has diver selectable alarms, deep stop reminders, DECO warnings, and has Air, Nitrox and Gauge Modes.

SCUBAPRO®

UWATEC
PROFESSIONAL DIVING EQUIPMENT

SCUBAPRO MK19 EVO/G260 REGULATOR

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.

AQUALUNG®

HELIX PRO REGULATOR

\$649.00

This 2022 Aqualung presents us with the Helix, a mid-priced regulator, which enjoys very good performance, undoubtedly above expectations.

It represents the DNA of the Aqualung regulators. It is without Question the best option in terms of value for money currently available.

The Helix Pro version has two added features:

Aqualung's patented ACD system, technology that protects the first stage from accidental entry of water or dirt even when the regulator is not under pressure.

And sealed ambient pressure chamber, suitable for cold and/or polluted waters.

Scubapro MK11/C370 Regulator

SCUBAPRO®

UWATEC
PROFESSIONAL DIVING EQUIPMENT

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.

PRICED RIGHT AT \$649.00
