### A SEASON OF HOPE

"Our God of Creation seems to give us a manifold witness to His mighty power and wisdom in Christ's resurrection in the budding flowers of Spring. The Easter Lily for one speaks loudly of the Good News of Resurrection Day. The bud represents the tomb in which death resides, but by His Grace the bud breaks forth into the pure white lily of new life. Easter is the day of hope and joy and victory.

Many of us will face these three days over and over and over in your lifetime. And when we do, we'll find ourselves asking three fundamental questions: Number one, what do I do in my days of pain? Two, how do I get through my days of doubt and confusion? Three, how do I get to the days of joy and victory?

The answer is Easter. We wish all of you a joyful Easter.

### TRAINING AT BEAVER LAKE ARKANSAS

Beaver Lake is a man-made reservoir in the Ozark Mountains of Northwest Arkansas and is formed by a dam across the White River only a few hours drive from Wichita. Beaver Lake waters are deep, clean, and clear. Beaver Lake is optimal for scuba diving because the water is deep and visibility is great making for interesting sites. JOIN US TO FINISH YOUR CERTIFICATION!

### COME JOIN US FOR A WEEKEND OF FUN

**EXTEND YOUR DIVING TIME**  
**BECOME A PADI ENRICHED AIR DIVER**  
ENRICHED AIR CLASS  
WE CUSTOMIZE THE SCHEDULE JUST FOR YOU

### ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

### Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

PEAK PERFORMANCE BUOYANCY  
GETTING AND STAYING NEUTRAL  
BETTER AIR CONSUMPTION  
BUILD SELF CONFIDENCE

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

EXPERIENCE A DIFFERENT KIND OF NIGHT LIFE

### WHY YOU SHOULD BUY GEAR

Scuba diving, like many recreational activities, is equipment intensive. Recreational diving has grown from an obscure sport practiced by a small band of youthful and athletic adventurers into an activity enjoyed by millions around the world in all kinds of water. Increasingly sophisticated and reliable, and the training to use it properly, are largely responsible for that growth.

Whether an item of dive gear is considered essential or desirable, each was conceived and developed to satisfy a definite need and perform a specific function. From regulator to gauges, mask to fins, and buoyancy compensator to wet suit, recreational scuba equipment is purposeful, interesting to use, and a big contributor to the overall fascination and attraction of diving.

Acquiring your own dive equipment is a major factor in the enjoyment of the sport. Sure, you can rent gear at many dive destinations, but do you really want to rely on the availability of much-used rental equipment for your personal safety and enjoyment of diving?

Owning your own dive gear has many advantages. As a beginning Open Water certification student, you can speed your learning curve and progress quickly into the open-water environment by purchasing and using a basic dive equipment package — regulator and BC in addition to mask, snorkel, and fins. Learning how to scuba dive involves a lot more than learning how to breathe through a regulator underwater. You learn the art of buoyancy control, the subtleties of swimming and streamlining, and a host of other skills. Acquiring these skills quickly and comfortably has a lot to do with the equipment you use in training. If the BC is too small, you will struggle with it, which interferes with your learning. Fit and comfort are the prime criteria in selecting most items of dive gear, and in achieving maximum safety and pleasure underwater. The best way to ensure that your gear fits correctly and comfortably is to wear your own.

Even if loaner or rental equipment fits well, it may not be right for you because of particular features - or lack of them. Features are what distinguish one item of dive gear from another. When you buy your own gear, you evaluate and choose the features you need and appreciate. The process is fun, adds greatly to your knowledge of diving, and ensures that the gear you dive with does what you want it to, the way you want it to.

You will know how to operate it properly and care for it responsibly. You will know the condition of your gear, where it has been, and who has been using it. That familiarity contributes to the highest level of safety, which in turn gives you peace of mind.

Other less obvious but still important benefits accrue from owning dive gear. Buying gear deepens your relationship with your dive shop. That shop is your conduit to diving. It offers training opportunities, arranges trips, keeps you in contact with other divers, and services and supports your equipment. Having your own equipment also marks you as a serious, committed diver, and it encourages you to dive regularly, to stay involved in the sport.

The bottom line on equipment ownership: It's the way to achieve maximum enjoyment of diving. Part of the commitment you are making to learn to dive should include acquiring your own dive gear. It's an excellent investment in yourself and in your future diving adventures.

### Scuba Gear

### SCUBAPRO MK19 EVO/G260 REGULATOR

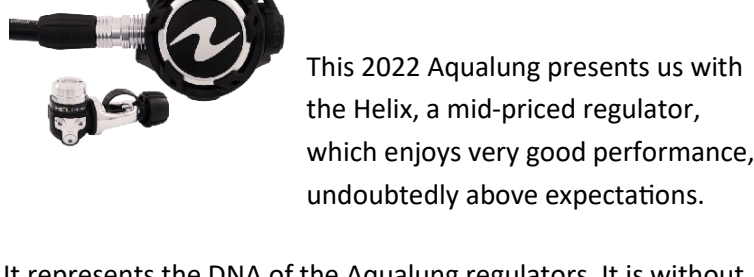

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.

### Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.

PRICED RIGHT AT \$643.00

### AQUALUNG HELIX PRO REGULATOR

\$649.00

This 2022 Aqualung presents us with the Helix, a mid-priced regulator, which enjoys very good performance, undoubtedly above expectations.

It represents the DNA of the Aqualung regulators. It is without question the best option in terms of value for money currently available.

The Helix Pro version has two added features:

Aqualung's patented ACD system, technology that protects the first stage from accidental entry of water or dirt even when the regulator is not under pressure.

And sealed ambient pressure chamber, suitable for cold and/or polluted waters.

### Aqua Lung Leg3rd
