PADI DISCOVER SCUBA

SCUBA REVIEW—OR JUST COME AND PLAY

AMBER WAVES DIVING AQUATIC CENTER POOL

SATURDAY FEBRUARY 15, 2023

Why PADI Scuba Review?

Are you a certified diver, but haven't been in the water lately? Are you looking to refresh your dive skills and knowledge? Are you a PADI Scuba Diver and want to earn your PADI Open Water Diver certification? If you answered yes to any of these questions then PADI Scuba Review is for you.

What do I need to start?

Hold a scuba certification
Minimum age: 10 years old

What will I do?

First, you'll review the safety information you learned during your initial training. Then, you head to the pool to practice some of the fundamental scuba skills

How long will it take?

A couple of hours

What will I need?

If you don't have your own gear you will need to rent gear.

I don't want a review, but I want to play?

No problem, Just sign up and come play in the pool for a couple of hours....we want you diving!

- \$100.00 for a Refresher (includes instructor fee, gear rental and pool fee)
- Just want to play but you don't have gear \$25.00 pool fee and Full gear rental 50% off. Total \$50 plus tax
- Have all your gear but just want to play? \$25.00

STARTS AT NOON

MAKE EVERY WEEKEND A DIVE WEEKEND

The Starfish Swim School, Family of Brands

OUR SWIM SCHOOL IS NOW OPEN. WE ARE TAKING STUDENTS FOR THE FEBRUARY AND MARCH CLASSES.

Curriculum

The innovative and learner-focused curriculum uses an "ages and stages" format so that you can offer swim lessons across the lifespan to a broad range of interests. You choose the programs to offer that are best suited to your situation and needs.

The Starfish Swim School program for pre-school, youth and adult students develops a foundation of swimming and safety skills with a focus on self-rescue: trust and submersion body positions and air recovery (includes rollover to back for air recovery) forward movement and direction change rotary movement (transitions from rollover to side position for air recovery) integrated movement age-appropriate safety skills such as asking permission, wearing a lifejacket, using flotation to make an assist, treading water, and survival float.

The Starfish Stroke School for youth and adult students develops effective swim technique and endurance for:

Freestyle

Backstroke

Butterfly

Breaststroke

Star Fun & Fitness provides eight different activity templates for scouts, homeschoolers, birthday parties, camps, after-school care, and school groups. The activities range from water safety through fitness training - with everything aquatic in between! There is also a water safety classroom presentation for outreach efforts.

Safety Training and Aquatic Rescue (STAR) is a practical and effective community water safety course that can be customized to the needs of the audience. The training is ideal training for parents/caregivers, child care personnel, foster families, and anyone who supervises or may have to help others in, on or near the water. STAR may be provided completely in person by your staff, or you can purchase online courses for distribution to your audience and provide an online or blended course.

We are working towards the goal of also being an "Aquatic-Fitness Center." We hope to offer water aerobics, water walking programs, arthritis aquatic exercise, along with many more similar programs.

Properly functioning gear is crucial Your safety depends on it. That's why we are the best technicians in the business to service your gear.

What to expect

We have certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulating System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.

PRICED RIGHT AT \$699.00

SCUBAPRO MK19 EVO/G260 REGULATOR

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN AIR-OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED COLD-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.

\$1,064.00

WHY YOU SHOULD BUY GEAR

Scuba diving, like many recreational activities, is equipment intensive. Recreational diving has grown from an obscure sport practiced by a small band of youthful and athletic adventurers into an activity enjoyed by millions around the world in all kinds of water. Increasingly sophisticated and reliable equipment, and the training to use it properly, are largely responsible for that growth.

Whether an item of dive gear is considered essential or desirable, each was conceived and developed to satisfy a definite need and perform a specific function. From regulator to gauges, mask to fins, and buoyancy compensator to wet suit, recreational scuba equipment is purposeful, interesting to use, and a big contributor to the overall fascination and attraction of diving.

Acquiring your own dive equipment is a major factor in the enjoyment of the sport. Sure, you can rent gear at many dive destinations, but do you really want to rely on the availability of much-used rental equipment for your personal safety and enjoyment of diving?

Owning your own dive gear has many advantages. As a beginning Open Water certification student, you can speed your learning curve and progress quickly into the open-water environment by purchasing and using a basic dive equipment package — regulator and BC in addition to mask, snorkel, and fins. Learning how to scuba dive involves a lot more than learning how to breathe through a regulator underwater. You learn the art of buoyancy control, the subtleties of swimming and streamlining, and a host of other skills. Acquiring these skills quickly and comfortably has a lot to do with the equipment you use in training. If the BC is too small, you will struggle with it, which interferes with your learning. Fit and comfort are the prime criteria in selecting most items of dive gear, and acquiring maximum safety and pleasure underwater. The best way to ensure that your gear fits correctly and comfortably is to wear your own.

Even if loaner or rental equipment fits well, it may not be right for you because of particular features - or lack of them. Features are what distinguish one item of dive gear from another. When you buy your own gear, you evaluate and choose the features you need and appreciate. The process is fun, adds greatly to your knowledge of diving, and ensures that the gear you dive with does what you want it to, the way you want it to.

You will know how to operate it properly and care for it responsibly. You will know the condition of your gear, where it has been, and who has been using it. That familiarity contributes to the highest level of safety, which in turn gives you peace of mind.

Other less obvious but still important benefits accrue from owning dive gear. Buying gear deepens your relationship with your dive shop. That shop is your conduit to diving. It offers training opportunities, arranges trips, keeps you in contact with other divers, and services and supports your equipment. Having your own equipment also marks you as a serious, committed diver, and it encourages you to dive regularly, to stay involved in the sport.

The bottom line on personal ownership: it's your own enjoyment of diving. In part of the commitment in yourself and in your future diving adventures.

Aqualung presents us with the Helix, Pro a mid-price regulator, which enjoys very good performance, undoubtedly above expectations.

It represents the DNA of the Aqualung regulators. It is without question the best option in terms of value for money currently available.

The Helix Pro version has two added features:

Aqualung's patented ACD system, technology that protects the first stage from accidental entry of water or dirt even when the regulator is not under pressure.

And sealed ambient pressure chamber, suitable for cold and/or polluted waters.

\$649.00

The Apeks XT50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price.

The Apeks XT50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks XT50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible
