SCUBA REVIEW—OR JUST COME AND PLAY

AMBER WAVES DIVING AQUATIC CENTER POOL

SATURDAY APRIL 12, 2023

Why PADI Scuba Review?

Are you a certified diver, but haven't been in the water lately? Are you looking to refresh your dive skills and knowledge? Are you a PADI Scuba Diver and want to earn your PADI Open Water Diver certification? If you answered yes to any of these questions then PADI Scuba Review is for you.

What do I need to start?

Hold a scuba certification
Minimum age: 10 years old

What will I do?

First, you'll review the safety information you learned during your initial training. Then, you head to the pool to practice some of the fundamental scuba skills

How long will it take?

A couple of hours

What will I need?

If you don't have your own gear you will need to rent gear.

I don't want a review, but I want to play?

No problem, Just sign up and come play in the pool for a couple of hours....we want you diving!

- \$100.00 for a Refresher (includes instructor fee, gear rental and pool fee)
- Just want to play but you don't have gear \$25.00 pool fee and Full gear rental 50% off. Total \$50 plus tax
- Have all your gear but just want to play? \$25.00

STARTS AT NOON

AMBER WAVES DIVING REPAIR CENTER

Properly functioning gear is crucial. Your safety depends on it. That's why we are the best technicians in the business to service your gear.

What to expect

We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, planning, organization, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

NIGHT DIVER

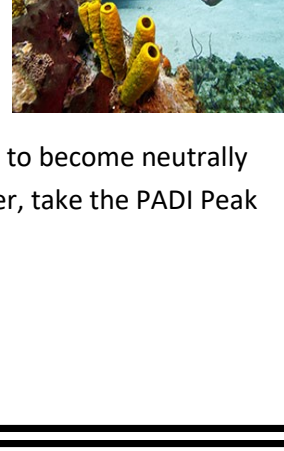

Who should take this course?

The thought of dipping below the surface at night seems mysterious, yet so alluring. Although you've been scuba diving at a site many times before, at night you drop into a whole new world and watch it come to life under the glow of your dive light. The scene changes as day creatures retire and nocturnal organisms emerge. If you've wondered what happens underwater after the sun goes down, sign up for the PADI Night Diver Specialty course.

PADI Peak Performance Buoyancy Specialty Course

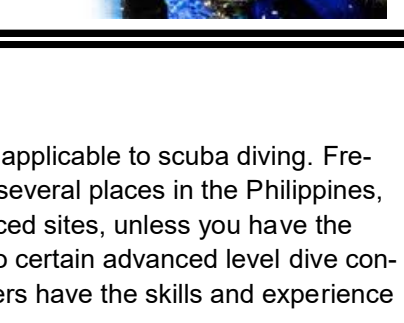

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

WHY BUY GEAR?

Whether an item of dive gear is considered essential or desirable, each was conceived and performed a specific function. From regulator to gauges, mask to fins, and buoyancy compensator to wet suit, recreational scuba equipment is purposeful, interesting to use, and a big contributor to the overall fascination and attraction of diving. Acquiring your own dive equipment is a major factor in the enjoyment of the sport. Sure, you can rent gear at many dive destinations, but do you really want to rely on the availability of much-used rental equipment for your personal safety and enjoyment of diving?

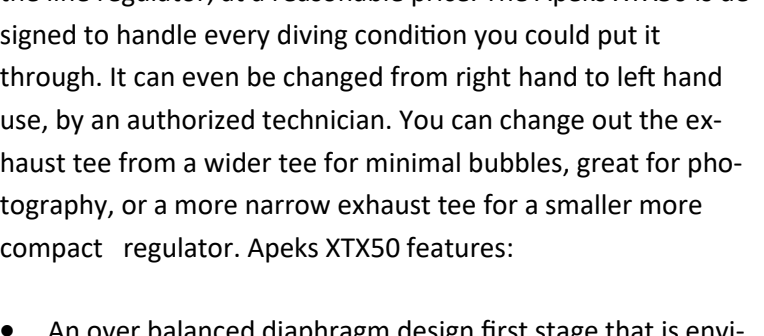

Owning your own dive gear has many advantages. As a beginning Open Water certification student, you can speed your learning curve and progress quickly into the open-water environment by purchasing and using a basic dive equipment package: regulator and BC in addition to mask, snorkel, and fins.

Learning how to scuba dive involves a lot more than learning how to breathe through a regulator underwater. You learn the art of buoyancy control, the subtleties of swimming and streamlining, and a host of other skills. Acquiring these skills quickly and comfortably has a lot to do with the equipment you use in training. If the BC is too small, you will struggle with it, which interferes with your learning. Fit and comfort are the prime criteria in selecting most items of dive gear, and in achieving maximum safety and pleasure underwater. Owning your own gear is the best way to ensure that your gear fits correctly and comfortably.

Even if loaner or rental equipment fits well, it may not be right for you because of particular features — or lack of them. Features are what distinguish one item of dive gear from another. When you buy your own gear, you evaluate and choose the features you need and appreciate. The process is fun, adds greatly to your knowledge of diving, and ensures that the gear you dive with does what you want it to, the way you want it to.

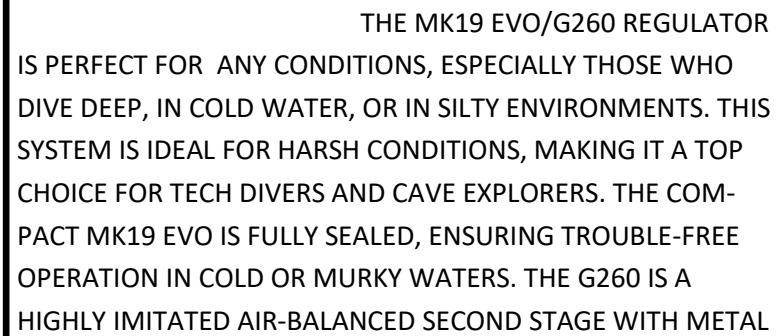

You will know how to operate it properly and care for it responsibly. You will know the condition of your gear, where it has been, and who has been using it. That familiarity contributes to the highest level of safety, which in turn gives you peace of mind. Other less obvious but still important benefits accrue from owning dive gear. Buying gear deepens your relationship with your dive store. That store is your conduit to diving. We offer training opportunities, arranges trips, keep you in contact with other divers, and services and support your equipment. Having your own equipment also marks you as a serious, committed diver, and it encourages you to dive regularly and stay involved in the sport.

The bottom line on equipment ownership: It's the way to achieve maximum enjoyment of diving. At Amber Waves Diving we recognize that once a customer buys their own gear they actually become a 'committed diver,' one that we see more than just once a year. Therefore, we believe that part of the commitment you are making to learn to dive should include acquiring your own dive gear. It's an excellent investment in yourself and in your future diving adventures.

The Apeks GTX50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks GTX50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for a wider tee for more bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks GTX50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible \$649.00

SCUBAPRO MK19 EVO/G260 REGULATOR

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER. \$1,064.00

Aqua Lung Leg3rd Regulator

AQUA LUNG \$879.00
