PADI Peak Performance Buoyancy Specialty Course

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW diver is just the ticket to a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

PEAK PERFORMANCE BUOYANCY

- GETTING AND STAYING NEUTRAL
- BETTER AIR CONSUMPTION
- BUILD SELF CONFIDENCE

EXPERIENCE A DIFFERENT KIND OF NIGHT LIFE

APEKS AQUA LUNG

The Apeks XT50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks XT50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks XT50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible \$649.00

PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, planning, organization, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

Discover the unmatched versatility of the Suunto Ocean Watch

A blend of a True Diver Computer and a True Sports Watch. Engineered for resilience, this watch stands as your ultimate companion under any environmental conditions. Whether you're exploring the depths of the ocean or traversing rugged landscapes and assures reliability and accuracy

\$899.95

SCUBAPRO MK19 EVO/G260 REGULATOR

\$1,064.00

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS THE NEXT STEP IN MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.

Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism.
