### TRAINING AT BEAVER LAKE ARKANSAS

Beaver Lake is a man-made reservoir in the Ozark Mountains of Northwest Arkansas and is formed by a dam across the White River only a few hours drive from Wichita. Beaver Lake waters are deep, clean, and clear. Beaver Lake is optimal for scuba diving because the water is deep and visibility is great making for interesting sites. JOIN US TO FINISH YOUR CERTIFICATION!

### PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, planning, organization, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

Discounted Price**

### PADI PEAK PERFORMANCE BUOYANCY SPECIALTY COURSE

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

### AMBER WAVES DIVING REPAIR CENTER

**Properly functioning gear is crucial  
Your safety depends on it. That's why we are the best technicians in the business to service your gear.**

**What to expect**

**We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!**

### ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

**Why should you take the Advanced Open Water Course?**

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

**PEAK PERFORMANCE BUOYANCY**  
**GETTING AND STAYING NEUTRAL**  
**BETTER AIR CONSUMPTION**  
**BUILD SELF CONFIDENCE**

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

### 4 Reasons Why You Need Your Own Scuba Regulator

Having your own scuba diving equipment is a major factor in the enjoyment of the sport. And, one of the first pieces of equipment I would recommend investing in is your scuba regulator.

Sure, you can rent gear from your local dive center or at many dive destinations. But, are you going to put your complete trust in the availability of an under-maintained, over-worked rental regulator for your personal safety and enjoyment of Diving.

I remember when I was just starting out diving. I was on a diving with a rental regulator; it worked fine for the beginning of the dive. However, a few minutes in the octopus begun to free flow a little and there was a terrible honking sound coming from the first stage with every breath I took.

I could still breathe from the second regulator pretty well, but I was more concerned about the sound coming from it than anything else. I even missed the Manta that everyone got to see except me.

After the dive trip I decide that I was going to invest in a regulator of my own. Below are the 4 major reasons why I believe you should buy your own regulator.

- Maintenance and Safety** – By owning will know the condition of your gear, where it has been, who has been using it, and when it was last serviced. That familiarity contributes to the highest level of safety and security, which in turn gives you peace of mind and an overall more enjoyable dive.
- Personalization** – Owning your own regulator give you to opportunity to personalize it to your liking, something that you simply cannot do with a rental. Also, most rentals are entry level regulators that often lack all the feature and performance that you would expect from a personal reg. You can buy a scuba regulator with all the features that suits your diving style and the conditions and environment that you will be diving in.
- Cost** – In the short-term renting a regulator might seem as the best option cost wise. However, if you are a frequent diver you will soon find out that the cost of constantly renting a regulator will turn out more expensive than having your own regulator in the long run.
- Availability** – What if you go to your local dive center to rent a regular and their out, then what? When you have your own regulator you don't need to worry about availability, it is yours so it will always be there. Also, there is no need to worry about making reservations to rent a regulator in the hope that they might not have any.

Don't take the chance with a rental or a loaner. Your dive regulator is your lifeline underwater, and is the most important piece of scuba diving equipment you can buy. The bottom line is that owning your own equipment allows you to maximize your enjoyment as well as your safety.

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism.

**PRICED RIGHT AT \$719.00**

### Suunto Ocean Wrist Computer with Charging Cable
