Wichita CPR Training
Provided by Amber Waves Diving Company

THANKS TO IDC INSTRUCTORS JENNIFER FRITZ AND MICHAEL JERNIGAN ALONG WITH DIVE MASTER PATRICK MOORE FOR THEIR WEEKEND SCUBA INSTRUCTION. GREAT JOB!

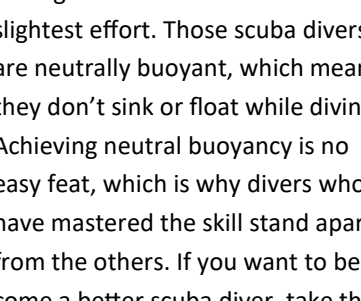

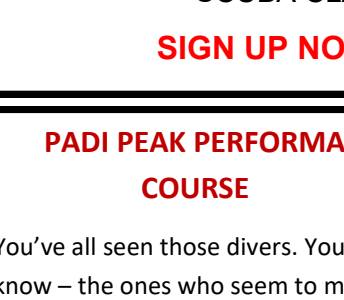

PICTURED ABOVE IS OUR SUNDAY AFTERNOON FIRST AID-CPR-AED TRAINING GRADUATES.

TRAINING AT BEAVER LAKE ARKANSAS

Beaver Lake is a man-made reservoir in the Ozark Mountains of Northwest Arkansas and is formed by a dam across the White River only a few hours drive from Wichita. Beaver Lake waters are deep, clean, and clear. Beaver Lake is optimal for scuba diving because the water is deep and visibility is great making for interesting sites. JOIN US TO FINISH YOUR CERTIFICATION!

PADI PEAK PERFORMANCE BUOYANCY SPECIALTY COURSE

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

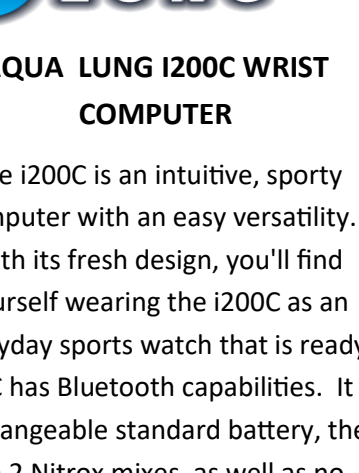

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

Explore diving in Bonaire

Bonaire is located just north of Venezuela in the southern Caribbean. This Dutch Caribbean Island has protected its marine resources for more than 35 years. Because of this, marine life abounds with more than 470 fish species found in Bonaire's waters. Famed as one of the best Caribbean dive destinations, Bonaire hosts amazing coral reefs and long forgotten shipwrecks. Because the island's dive sites are protected from any currents, this is one of the best places in the world to gain a new certification.

Visitors to Bonaire can choose between boat and shore diving. Most resorts have gorgeous reefs just offshore, but those visiting the further reaches of Bonaire National Marine Park will want to book a few dives from the region's dive boats.

When to dive in Bonaire

Bonaire's dry season lasts from April to November. During these months, the island will be dry and sunny, experiencing practically no rain at all. Sea conditions remain steady and calm throughout the season with sea temperatures at 84°F (29°C) and air temperatures approximately 89°F (31°C). The dry season is recommended for those who value both beach time and dive time.

Bonaire is located outside of the hurricane zone so is therefore less at risk than other Caribbean islands. When it comes down to it, any time is the best time to dive in Bonaire. The marine life is unchanged between seasons. You can feel comfortable in the knowledge that you'll experience great diving during any month of the year

Won't you join us in May 2026?
