## Why We Scuba Dive

The reasons why we scuba dive are as unique as the people who enjoy the sport, but researchers have found that long-term well-being is a result of regular diving.

PADI is well known for its theory of the four E's of diving: Education, Experience, Equipment and Environmental conservation. While investigating why we scuba dive, researchers Balvinder Kler and John Tribe identified four more E's of scuba diving: Escape, Esteem, Expertise and Education.

They go further, though, to add "Eudaimonia" to that list. This Greek term roughly translates to "the good life," "human flourishing" or "well-being." It not only points to finding happiness and pleasure in life but doing so in a virtuous manner.

### What diving does for us

The researchers found that divers derive long-term satisfaction and happiness as eudaimonia through participating in diving. A sense of well-being occurs when we improve our skills and virtues in activities that we are passionate about. As divers, we gain a sense of well-being through learning more about ourselves, others, diving and the underwater environment around us.

Diving offers a number of different avenues to further our education. It starts with learning to dive and continues with improving our skills after initial qualification. Diving

offers access to a whole new environment and teaches us how to exist and be comfortable underwater. Most importantly, diving educates us about the wondrous and unique marine life we encounter.

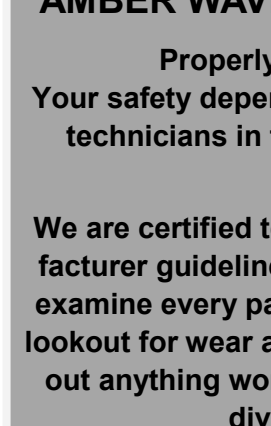

Diving also offers us the opportunity to travel. This in itself is a way of expanding our knowledge and skills through new experiences and cultural emersion. Traveling often leads to positive a experience which, according to the researchers, contributes to obtaining "the good life."

Enthusiastic divers tend to become more environmentally aware and participate in more environmentally sensitive behavior. Many divers share a sense of responsibility to advocate for and protect the environment, which extends further than just the underwater world.

### Personal growth

Divers also experience personal growth through sharing experiences with other divers, strengthening bonds and something academics call "serious leisure." This refers to leisure activities that encourage self-enrichment, self-expression, self-actualization, recreating or rediscovering yourself, creating social connections and a feeling of belonging. As in diving, these activities usually require special knowledge, skills and training in order to participate.

Individuals can even get to a stage where a serious-leisure activity can become a central point of their life. They may begin to strongly identify with that activity. And let's be honest — how many of us choose travel destinations based on the quality or uniqueness of the diving or sneak in a quick dive on a business trip?

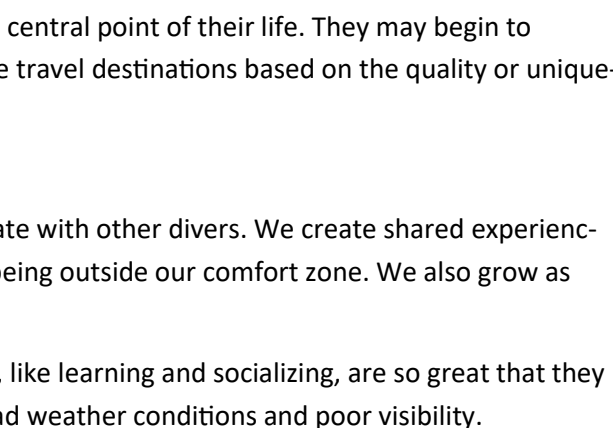

### Creating community

Furthermore, divers grow through the friendships we create with other divers. We create shared experiences, learn from each other and become comfortable with being outside our comfort zone. We also grow as families when we enjoy the sport together.

The researchers even found that the positive experiences, like learning and socializing, are so great that they often outweigh potential negative experiences, such as bad weather conditions and poor visibility.

Ultimately, we dive because diving offers us the opportunity to engage in positive experiences. It gives us satisfaction long after we return to the surface. In short, diving makes us happy and helps us flourish. Now, let's get back into the water and dive some more.

## AMBER WAVES DIVING REPAIR CENTER

Properly functioning gear is crucial  
 Your safety depends on it. That's why we are the best technicians in the business to service your gear.

### What to expect

We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

### Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters.

Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism.

**PRICED RIGHT AT \$699.00**

## YES WE HAVE BCDs IN STOCK

SCUBA PRO GLIDE

SCUBA PRO WOMEN'S BELLA

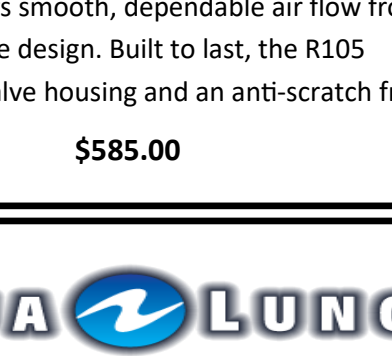

AQUA LUNG WOMEN'S SOUL

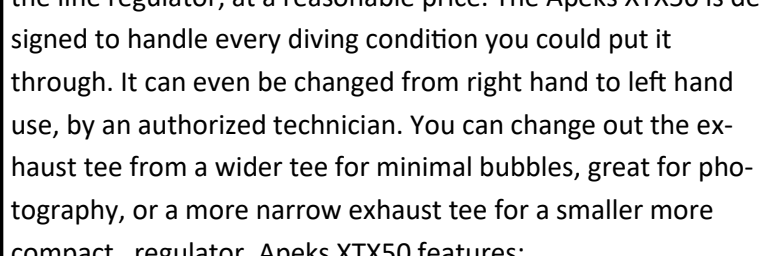

AQUA LUNG AXIOM

**IT'S TIME TO OWN YOUR OWN BCD**

The new MK11 EVO/R105 is a simple, rugged and reliable air delivery system. The MK11 EVO is a compact balanced diaphragm first stage with a forged brass body fitted with thermal fins and protective plastic bumpers to ward off scratches. The R105 delivers smooth, dependable air flow from its classic downstream valve design. Built to last, the R105 features a durable metal valve housing and an anti-scratch front cover.

**\$585.00**

The Apeks XTX50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks XTX50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks XTX50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible

**\$649.00**

**Aqua Lung Leg3rd Regulator**

**AQUA LUNG**

**EVERYTHING YOU'D EVER WANT IN A REGULATOR**

**\$879.00**

**\$1,049.00**

**SCUBAPRO MK19 EVO/G260 REGULATOR**

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.

## SUUNTO

### Suunto Ocean Wrist Computer with Charging Cable

**Discover the unmatched versatility of the Suunto Ocean Watch**

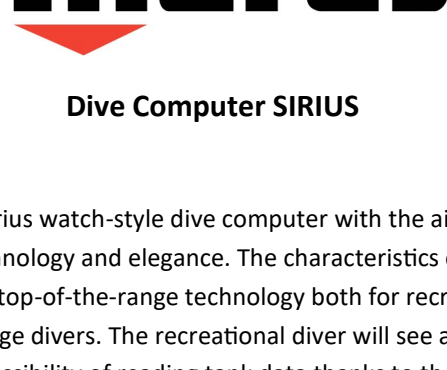

A perfect blend of a True Dive Computer and a True Sports Watch. Engineered for resilience, this watch stands as your ultimate companion under any environmental conditions. Whether you're exploring the depths of the ocean or traversing rugged landscapes and assures reliability and accuracy

**\$799.95**

With Transmitter

**\$1,100.00**

### Dive Computer SIRIUS

Mares designed the new Sirius watch-style dive computer with the aim of perfectly combining technology and elegance. The characteristics of this dive computer feature top-of-the-range technology both for recreational and Extended Range divers. The recreational diver will see a simple screen, with the possibility of reading tank data thanks to the optional tank module. The Extended Range diver can insert up to five nitrox and trimix mixes to manage technical dives. The interchangeable strap allows the Extended Range diver to use any suit thickness. Its refined style makes the Sirius the perfect accessory, even out of the water. Available in black or black/silver versions.

**\$659.95**

**ENRICHED AIR CLASS**
