

2025 DOMINICA MEMORIES

2025 ROATAN MEMORIES

2026 WILL BE A GREAT DIVE YEAR

Every year around this time a lot of people set many goals for the next year. "Lose 20 pounds", "get a new job", "buy a house", "get married", and so on. But us divers are different! Our goals tend to revolve around diving, and there is nothing wrong with that!

Check out our list of EIGHT New Year's Resolutions that can help you become a better, more diverse diver, dive buddy, and ocean lover in 2026!

- 1. Do better with air consumption:** Not only does this help you become a better diver and let you extend your dives, but it also helps your buddy as well so that they do not have to end their dive with 1,200 PSI left because you have already gone through your air. But how do you do this? Besides just diving more (i.e. practice), being more fit and having better overall health can certainly help you as you can better control your breathing rate. Join us during the winter while we're at the pool. You get exercise and can hone your buoyancy skills. Another BIG factor in air consumption is the regulator you use. That's correct, the newer models are better engineered and offer system (s) that correct for depth and other factors. Additionally, is your regular well maintained?
- 2. Check out a new local dive site:** No matter if you live in a landlocked state with a few lakes or rivers nearby, on the coast in Florida, or on a warm exotic island somewhere, a lot of divers can become bored of diving the same sites over and over. Go check out somewhere new! Many of you won't venture out to Beaver Lake with us. Why? It has great diving and beautiful scenery. Trust me on this, WE MAKE IT FUN!
- 3. Take a dive trip somewhere new:** If you have the means to travel, by all means do it! Whether it is a quick 2 hour drive, a 2 hour flight, or even a 20 hour flight, check somewhere off of your bucket list! We are going to Bonaire in May and then to Cayman Brac in the fall. Watch our newsletters for these great trips.
- 4. Buy a new piece of dive gear, or upgrade something old:** The dive industry is constantly progressing, which means all sorts of dive gear manufacturers are always coming out with the latest and greatest technology updates to their previous products. Treat yourself to something new! Or if you are still renting some pieces of equipment, a tank, a BCD, etc., why not get your own?
- 5. Take a new specialty:** Don't limit what dives you can do because you don't think you will ever be somewhere that it is necessary. You never know what opportunities will present themselves, and you don't want to have to pass up a great dive trip just because you do not have the right credentials. Have you been fascinated with DPV's (Diver Propulsion Vehicles) and wanted to try one? Take the class! Have you been wanting to check out "Full Face Mask with communications." We can get that done for you.
- 6. Get your gear serviced:** Don't risk being on a boat, gearing up, and then realizing you have a leaky hose and have to cancel your dive. Especially if you have not used your gear in an extended period of time, bring it into our Repair Department to have it serviced. Remember, dive gear will last a long time as long as you take care of it, so if you do not want to replace it all right away, keep on a regular service schedule.
- 7. Buddy up with an excited new diver and show them the ropes:** Do you remember how excited you were right after you received your Open Water Certification? There are new divers certified every day, and a lot of them have no idea what to do next, and may not have a buddy. You were there once, so stay involved in the Amber Waves Diving Club. Club, you say? Yep, we have divers hanging around, coming on trips with us, and helping out. We encourage them to be part of the shop, so that you can meet a "new" dive buddy.
- 8. Buddy up with a more experienced diver and learn from them:** Even the all-time greats in every sport or activity can always learn something new. Reach out and find a diver who is more experienced than you, especially in your local area, and invite them on a dive. You won't believe some of the stories and possibly some of the new knowledge and tips you can learn!

LET'S MAKE 2026 A YEAR OF HAPPY MEMORIES

HYDROS PRO 2 REVIEW

The new MK11 EVO/R105 is a simple, rugged and reliable air delivery system.

The MK11 EVO is a compact balanced diaphragm first stage with a forged brass body fitted with thermal fins and protective plastic bumpers to ward off scratches. The R105 delivers smooth, dependable air flow from its classic downstream design. Built to last, the R105 features a durable metal valve housing and an anti-scratch front cover.

\$585.00

Apeks Aqua Lung

The Apeks GTX50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks GTX50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. You can change out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks GTX50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible

Dive Computer SIRIUS

Mares designed the new Sirius watch-style dive computer with the aim of perfectly combining technology and elegance. The characteristics of this dive computer feature top-of-the-range technology both for recreational and Extended Range divers. The recreational diver will see a simple screen, with the possibility of reading tank data thanks to the optional tank module. The Extended Range diver can insert up to five nitrox and trimix mixes to manage technical dives. The interchangeable strap allows the Extended Range diver to use any suit thickness. Its refined style makes the Sirius the perfect accessory, even out of the water. Available in black or black/silver versions.

\$659.95

Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism.

PRICED RIGHT AT \$699.00

SCUBAPRO MK19 EVO/G260 REGULATOR

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL COMPONENTS AND A LEFT-RIGHT HOSE ATTACHMENT OPTION, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.
