## AcprTRAINING

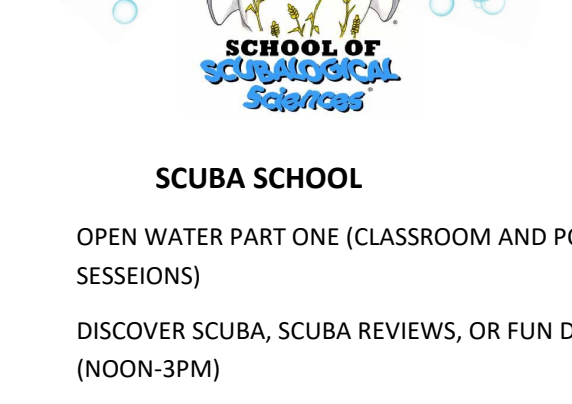

[To unsubscribe click here](#)

We held our Annual Staff Meeting on Saturday January 3rd. We finalized the 2026 Schedule, discussed Training needs, and enjoyed wonderful fellowship with friends, and of course I forgot to get a group picture. I'm the one with the glasses.

Pictured above is our Sunday afternoon First Aid-CPR graduates.

### SCUBA SCHOOL

JAN 9-11	OPEN WATER PART ONE (CLASSROOM AND POOL SESSEIONS)
JAN 10	DISCOVER SCUBA, SCUBA REVIEWS, OR FUN DIVE (NOON-3PM)
JAN 11	OPEN POOL DIVE (2-4 PM)
JAN 16-18	OPEN WATER PART ONE (CLASSROOM AND POOL SESSEIONS)
JAN 17	DISCOVER SCUBA, SCUBA REVIEWS, OR FUN DIVE (NOON-3PM)
JAN 18	OPEN POOL DIVE (2-4 PM)
JAN 23-25	OPEN WATER PART ONE (CLASSROOM AND POOL SESSEIONS)
JAN 24	DISCOVER SCUBA, SCUBA REVIEWS, OR FUN DIVE (NOON-3PM)
JAN 25	OPEN POOL DIVE (2-4 PM)
JAN 30-FEB 1	OPEN WATER PART ONE (CLASSROOM AND POOL SESSEIONS)
JAN 31	DISCOVER SCUBA, SCUBA REVIEWS, OR FUN DIVE (NOON-3PM)
FEB 1	OPEN POOL DIVE (2-4 PM)
FEB 6-8	OPEN WATER PART ONE (CLASSROOM AND POOL SESSEIONS)
FEB 7	DISCOVER SCUBA, SCUBA REVIEWS, OR FUN DIVE (NOON-3PM)
FEB 8	OPEN POOL DIVE (2-4 PM)
FEB 13-15	OPEN WATER PART ONE (CLASSROOM AND POOL SESSEIONS)
FEB 14	DISCOVER SCUBA, SCUBA REVIEWS, OR FUN DIVE (NOON-3PM)
FEB 15	DISCOVER SCUBA, SCUBA REVIEWS, OR FUN DIVE (NOON-3PM)

### AMBER WAVES DIVING REPAIR CENTER

Properly functioning gear is crucial  
Your safety depends on it. That's why we are the best technicians in the business to service your gear.

**What to expect**

We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

### EXTEND YOUR DIVING TIME

## BECOME A PADI ENRICHED AIR DIVER

**ENRICHED AIR CLASS**

WE CUSTOMIZE THE SCHEDULE JUST FOR YOU

### WHY DIVE NITROX?

- Longer Bottom Times:** Recreational nitrox (21 - 40% oxygen) contains a lower percentage of nitrogen than air. The reduced percentage of nitrogen in recreational nitrox allows divers to extend their no-decompression limits(or dive time) by reducing nitrogen absorption – the less nitrogen there is in a diver's breathing gas, the slower his nitrogen absorption will be at a given depth. For example, according to the NOAA (National Oceanographic and Atmospheric Association) no-decompression dive tables, a diver using Nitrox 36 (or NOAA Nitrox II) may stay up to 50 minutes at 90 feet of sea water, while a diver using air may only stay a maximum of 30 minutes at this depth.
- Shorter Surface Intervals:** A diver using nitrox absorbs less nitrogen for a given depth and dive time than a diver using air. This means that the nitrox diver has less nitrogen to off-gas during a surface interval, which can shorten the required surface interval drastically. For example, a diver using Nitrox 32 (NOAA Nitrox I) can repeat a 50 minute dive to 60 feet after 41 minutes, while a diver using air must wait a minimum of 8 hours to repeat the same dive (using to NOAA's no decompression dive tables).
- Longer Repetitive Dive Times:** Nitrox becomes especially useful for divers who engage in more than one dive per a day. A diver using nitrox will have a longer allowable bottom time on a repetitive dive than a diver using air because the diver using nitrox has absorbed less nitrogen. For example, after a dive to 70 feet for 30 minutes, a diver using Nitrox 32 can stay at 70 feet for a maximum of 24 minutes if he immediately reenters the water. However, a diver performing the same series of dives on air may only stay at 70 feet for 19 minutes on his second dive (according to NOAA's no decompression dive tables).
- Reduced Exhaustion:** Many divers claim to feel less exhausted after a dive on nitrox than after a comparable dive on air. By reducing a diver's nitrogen absorption, nitrox may also reduce a diver's post-dive exhaustion.
- Shorter Decompression:** Technical divers use nitrox to reduce decompression requirements. If nitrox is used throughout the dive, the diver may require shorter or fewer decompression stops. If nitrox is used as a decompression gas (the diver only breathes nitrox during the decompression stops), the decompression stops will be shorter.

## Wichita CPR Training

Provided by Amber Waves Diving Company

WICHITAacprTRAINING Center can provide you training in Emergency First Responder, American Heart Association, American Safety and Health Institute, and the National Safety Council. Our Instructors have real world experience in providing first aid care and will provide you a 'real life' training experience. We also sell every brand of AEDs.

Call 316-775-6688 to schedule your class

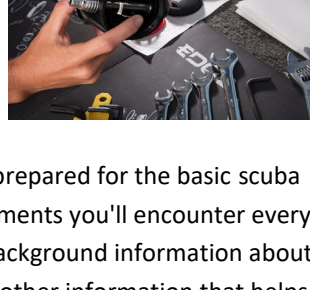

## PADI

### Equipment Specialist

### PADI EQUIPMENT SPECIALTY COURSE...IS IT WORTH IT?

Don't miss a dive due to a scuba gear issue. Whether it's a blown O-ring, regulator problem, wetsuit tear or a broken fin strap, you can learn how to manage basic scuba equipment adjustments.

As a PADI Equipment Specialist, you are prepared for the basic scuba equipment maintenance, care and adjustments you'll encounter every day. In addition, you'll learn interesting background information about how your gear works, how it's repair and other information that helps you with your equipment investment.

Additionally, if you don't already have your PADI Advanced Certification, this course counts as one of your dives. More importantly this course counts toward a specialty needed for your Master Scuba Diver Certification.

PADI Equipment Specialty - How does it work?

To enroll in the PADI Equipment specialty course in Bali, you must be a PADI Scuba Diver (or qualifying certification from another organization). No dives are required, so you can take the Equipment Specialist course any time of the year.

With the PADI equipment specialty course you will come to our dive center where our instructor will go through the following with you:

- Review the theory, principles and operation of scuba diving equipment
- Learn about routine, recommended care and maintenance procedures, and equipment storage
- How to overcome common problems with equipment and recommended professional maintenance procedures (may include a demonstration of repair procedures).
- Gain simple suggestions for comfortable equipment configurations and an introduction to new gear (may include optional confined water dive to try new or unfamiliar equipment).

PADI Equipment Specialty - Where will I dive?

The PADI Equipment Specialty course is a non-diving specialty course which means that there are no dives included in the course.

### Discover the top 10 dive sites on Bonaire

Bonaire is the best place for beginners to learn scuba diving and for advanced divers to add even more dream dives to their list. With over 63 marked dive sites, some stunning unmarked spots, and a water temperature that makes diving year-round pleasant, Bonaire has been voted Best Shore Diving destination for 25 consecutive years. Explore some of its most beautiful dive sites now.

#### 1. Karpata

Bonaire has over 350 fish species and nearly 50 different corals to admire. You can find many of these magnificent species at dive site Karpata. A few stairs will take you down to the concrete platform at the water's edge where you can submerge yourself in a lush underwater world that you'll remember for years to come.

#### 2. Hilma Hooker

Wreck divers from all over the world visit the dive site Hilma Hooker. This cargo ship was sunk relatively close to shore, with its deepest point at 100 feet (30m), which makes the Hilma Hooker accessible to advanced recreational divers. While the outside of this immense wreck is memorable in itself, it is possible to dive through it as well. The latter is possible for experienced divers with a wreck diver certificate only.

#### 3. White Slave

Never seen a ray in its natural habitat? Look for a spotted eagle ray or stingray on the sand plateau at White Slave. The start of this dive spot is rocky and it's a bit of a swim to the reef, but once there you are treated to beautiful underwater life surrounding a range of corals. And from rays, you have a fair chance of spotting surgeon fish and turtles.

#### 4. Salt Pier

A must-do dive site in Bonaire if you ask us. While the reef is not very impressive here, the Salt Pier attracts many fish. You can see big schools of snappers, grunts and goatfish. With a little luck you may also find scorpionfish or an octopus!

#### 5. 1000 steps

No worries! Despite what the name implies, it's only 72 steps down to the beach. Once on the beach it's a leisurely dive to the coral formations that start in shallow waters; which makes this dive spot perfect for snorkeling as well. Drift over a rainbow of colorful flora, but don't tire too much, as you have to take your gear back up the "10000 steps" afterwards.

#### 6. Vista Blue

This dive sites are near the southernmost point of Bonaire. The reefs are covered with swaying soft corals. A white sandy beach at Vista Blue offers you the perfect entrance to the ocean.

#### 7. Margate Bay

This dive site is located on the south-west side of Bonaire. The spot derives its name from the Black Margate, a species that is often seen here.

#### 8. Something Special

Centrally located on the island, this beautiful dive site truly is Something Special. On a plateau in the shallow waters, you can find many Secretary Blennies, Yellowhead Jawfish and Sailfin Blennies.

#### 9. Angel City

Close to the Hilma Hooker you will find the less explored dive spot Angel City. The site is known for its double reef system.

#### 10. Lac Cai

On the east side of Bonaire, you can find Lac Cai. It is a dive site for more experienced divers where local knowledge is required. Your effort will doubtlessly be rewarded with turtles, tarpons and spotted eagle rays.

### Dive Computer SIRIUS

Mares designed the new Sirius watch-style dive computer with the aim of perfectly combining technology and elegance. The characteristics of this dive computer feature top-of-the-range technology both for recreational and Extended Range divers. The recreational diver will see a simple screen, with the possibility of reading tank data thanks to the optional tank module. The Extended Range diver can insert up to five nitrox and trimix mixes to manage technical dives. The interchangeable strap allows the Extended Range diver to use any suit thickness. Its refined style makes the Sirius the perfect accessory, even out of the water. Available in black or black/silver versions.

**\$659.95**

### AQUA LUNG i200C WRIST COMPUTER

The i200C is an intuitive, sporty computer with an easy versatility. With its fresh design, you'll find yourself wearing the i200C as an everyday sports watch that is ready to dive when you are. The i200C has Bluetooth capabilities

**\$470.00**

### SCUBAPRO MK19 EVO/G260 REGULATOR

**\$1,049.00**

The MK19 EVO/G260 regulator is perfect for ANY CONDITIONS, ESPECIALLY those who dive deep, in cold water, or in silty environments. This system is ideal for harsh conditions, making it a top choice for tech divers and cave explorers. The compact MK19 EVO is fully sealed, ensuring trouble-free operation in cold or murky waters. The G260 is a highly imitated air-balanced second stage with metal components and a left-right hose attachment option, making it excellent for tech diving setups and a consistent top performer.
