CALL 316-775-6688 FOR INFORMATION

**JUST CALL AND SCHEDULE YOUR CLASS**

### ADVANCED OPEN WATER COURSE

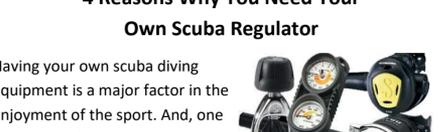

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

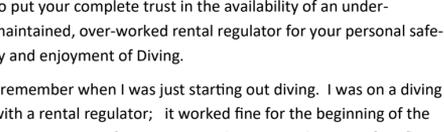

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can complete the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

### Why should you take the Advanced Open Water Course?

Open Water Divers who learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, organization, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

### 4 Reasons Why You Need Your Own Scuba Regulator

Having your own scuba diving equipment is a major factor in the enjoyment of the sport. And, one of the first pieces of equipment I would recommend investing in is your scuba regulator.

Sure, you can rent gear from your local dive center or at many dive destinations. But, are you going to put your complete trust in the availability of an under-maintained, over-worked rental regulator for your own safety and enjoyment of Diving.

I remember when I was just starting out diving. I was on a diving with a rental regulator; it worked fine for the beginning of the dive. However, a few minutes in the octopus begun to free flow a little and there was a terrible honking sound coming from the first stage with every breath I took.

I could still breathe from the regulator pretty well, but I was more concerned about the sound coming from it than anything else. I even missed the Manta that everyone got to see except me.

After the dive trip I decide that I was going to invest in a regulator of my own. Below are the 4 major reasons why I believe you should buy your own regulator.

- Maintenance and Safety** – By owning will know the condition of your gear, where it has been, who has been using it, and when it was last serviced. That familiarity contributes to the highest level of safety and security, which in turn gives you peace of mind and an overall more enjoyable dive.
- Personalization** – Owning your own regulator give you to opportunity to personalize it to your liking, something that you simply cannot do with a rental. Also, most rentals are entry level regulators that often lack all the feature and performance that you would expect from a personal reg. You can buy a scuba regulator with all the features that suits your diving style and the conditions and environment that you will be diving in.
- Cost** – In the short-term renting a regulator might seem as the best option cost wise. However, if you are a frequent diver you will soon find out that the cost of constantly renting a regulator will turn out more expensive than having your own regulator in the long run.
- Availability** – What if you go to your local dive center to rent a regular and their out, then what? When you have our own regulator you don't need to worry about availability, it is yours so it will always be there. Also, there is no need to worry about making reservations to rent a regulator in the hope that they might not have any.

Don't take the chance with a rental or a loaner. Your dive regulator is your lifeline underwater, and is the most important piece of scuba diving equipment you can buy. The bottom line is that owning your own equipment allows you to maximize your enjoyment as well as your safety.

### SEARCH & RECOVERY

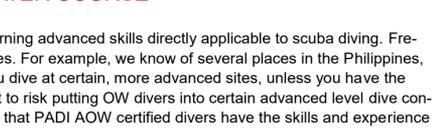

The Apeks XT50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apeks XT50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use by an authorized technician. You can create out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apeks XT50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right hand to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible

\$749.00

### SCUBAPRO MK11/C370 Regulator

The MK11 EVO/G260 regulator is perfect for ANY CONDITIONS, ESPECIALLY those who dive deep, in cold water, or in silty environments. This system is ideal for harsh conditions, making it a top choice for tech divers and cave explorers. The compact MK11 EVO is fully sealed, ensuring trouble-free operation in cold or murky waters. The G260 is a highly imitated air-balanced second stage with metal components and a left-right hose attachment option, making it excellent for tech diving setups and a consistent top performer.

**simply the best**

### Scubapro MK11/C370 Regulator

The MK11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters.

Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism.

**PRICED RIGHT AT \$699.00**
