WHERE THE PRAIRIE MEETS THE SEA

[To unsubscribe click here](#)

Wednesday and Thursday we hosted a Discover Scuba Camp for the 5th grade classes at Collegiate Academy. There was a lot of excitement, laughs, and thank you salutations. The kids were very polite and helped me remember why we do this thing we do. Instructors Royce Taylor, Dan Wegner, and Blaine Garrett along with Dive Master Jeff Gillam did a fantastic job of creating a fun and safe environment for the kids and staff.

Pictured above is our weekend SCUBA students and staff. Thanks to Instructors Mike Jernigan and Mark German along with Assistant Instructor Craig Chiznik for helping to get this group trained 'up' for the lake.

A SEASON OF HOPE

"Our God of Creation seems to give us a manifold witness to His mighty power and wisdom in Christ's resurrection in the budding flowers of Spring. The Easter Lily for one speaks loudly of the Good News of Resurrection Day. The bud represents the tomb in which death resides, but by His Grace the bud breaks forth into the pure white lily of new life. Easter is the day of hope and joy and victory.

Many of us will face these three days over and over and over in your lifetime. And when we do, we'll find ourselves asking three fundamental questions: Number one, what do I do in my days of pain? Two, how do I get through my days of doubt and confusion? Three, how do I get to the days of joy and victory?

The answer is Easter. We wish all of you a joyful Easter.

GRADUATE

SCHOOL OF SCUBA DIVING SCIENCES

SCUBA SCHOOL

APRIL 10-12	OPEN WATER PART ONE (CLASSROOM AND POOL SESSIONS)

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some the wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newer certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that long knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a dive surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

PEAK PERFORMANCE BUOYANCY

GETTING AND STAYING NEUTRAL

BETTER AIR CONSUMPTION

BUILD SELF CONFIDENCE

NITRO NITRO

PADI Peak Performance Buoyancy Specialty Course

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, planning, organization, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

SCUBAPRO

SCUBAPRO MK19 EVO/G260 REGULATOR

\$1,049.00

The MK19 EVO/G260 regulator is perfect for ANY CONDITIONS, ESPECIALLY those who dive deep, in cold water, or in silty environments. This system is ideal for harsh conditions, making it a top choice for tech divers and cave explorers. The compact MK19 EVO is fully sealed, ensuring trouble-free operation in cold or murky waters. The G260 is a highly limited air-balanced second stage with metal components and a left-right hose attachment option, making it excellent for tech diving setups and a consistent top performer.

simply the best

The Apex XTX50 Regulator is what you're looking for in a top of the line regulator, at a reasonable price. The Apex XTX50 is designed to handle every diving condition you could put it through. It can even be changed from right hand to left hand use, by an authorized technician. It can be changed out the exhaust tee from a wider tee for minimal bubbles, great for photography, or a more narrow exhaust tee for a smaller more compact regulator. Apex XTX50 features:

- An over balanced diaphragm design first stage that is environmentally sealed
- Four medium pressure ports, with optional fifth
- Easily converts from right to left hand, by factory authorized technician
- Pneumatically balanced second stage
- Diver changeable exhaust tee
- Nitrox compatible

\$749.00

SCUBAPRO

The new MK11 EVO/R105 is a simple, rugged and reliable air delivery system. The MK11 EVO is a compact balanced diaphragm first stage with a forged brass body fitted with scratches. The R105 delivers smooth, dependable air flow from its classic downstream valve design. Built to last, the R105 features a durable metal valve housing and an anti-scratch front cover.

\$585.00

Scubapro MK11/C370 Regulator

The MK11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism.

PRICED RIGHT AT \$699.00
