WICHITA METRO SCUBA HEADQUARTERS

WE RECEIVED AN ORDER OF SCUBA TANKS TO MEET YOUR SUMMER SCUBA NEEDS.

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

EXPERIENCE A DIFFERENT KIND OF NIGHT LIFE

The Author certainly got this right.

Why I love scuba diving. The moment I took my first breath underwater, I knew my whole life had changed and the more I dive, the more I seem to love scuba diving.

I love the anticipation at the beginning of every dive. Every time I drop below the surface of the water, the only thing I know for sure that is awaiting me is adventure. Every dive is different – EVERY DIVE. You could be diving the same spot, on the same dive site, 500 times and each one would be different.

There could be different animals present, or the same animals exhibiting different behaviors. The currents can change creating a mild drift or a ripping ride. The light breaking the waves on the surface can turn yesterday's drab looking swim over a patch of reef into today's stunning kaleidoscope of colors.

I love the silence. At no time in my life can I recall getting to spend a totally silent and undisturbed hour with only my own breathing breaking the silence. No cell phones, no TV, no traffic noise, no one talking to you (or at you), and none of the endless cacophony of sounds that makes up our daily routine. Diving is one of the most peaceful and spiritual activities I have ever done, but it is also one of the most exciting.

I love looking into the eyes of a sea turtle and seeing them look back at you. I love stalking the reef or the sand looking for creatures so bizarre they would seem to be aliens from another planet taking their vacation under our seas. I love seeing a sunken shipwreck, a giant Manta Ray, a microscopic pygmy seahorse, or a pod of dolphins racing by as I smile in disbelief.

I love sharing it with others. I love sharing a beer at the pool bar with new and seasoned divers discussing all we saw that day and all we hope to see in the dives to come. One of the best things about diving is sharing it with other divers. I feel so privileged to be a diver and to share that world with all of you.

PADI Peak Performance Buoyancy Specialty Course

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, and organization of diving between the depths of 60 feet to 130 feet.

The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

NIGHT DIVER

Who should take this course?

The thought of dipping below the surface at night seems mysterious, yet so alluring. Although you've been scuba diving at a site many times before, at night you drop into a whole new world and watch it come to life under the glow of your dive light. The scene changes as day creatures retire and nocturnal organisms emerge. If you've wondered what happens underwater after the sun goes down, sign up for the PADI Night Diver Specialty course.

SCUBAPRO MK19 EVO/G260 REGULATOR

THE MK19 EVO/G260 REGULATOR IS PERFECT FOR ANY CONDITIONS, ESPECIALLY THOSE WHO DIVE DEEP, IN COLD WATER, OR IN SILTY ENVIRONMENTS. THIS SYSTEM IS IDEAL FOR HARSH CONDITIONS, MAKING IT A TOP CHOICE FOR TECH DIVERS AND CAVE EXPLORERS. THE COMPACT MK19 EVO IS FULLY SEALED, ENSURING TROUBLE-FREE OPERATION IN COLD OR MURKY WATERS. THE G260 IS A HIGHLY IMITATED AIR-BALANCED SECOND STAGE WITH METAL, MAKING IT EXCELLENT FOR TECH DIVING SETUPS AND A CONSISTENT TOP PERFORMER.

\$1,049.00

Scubapro MK11/C370 Regulator

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism. This first stage comes standard with the Thermal Insulation System (TIS), which keeps your first stage from freezing up and malfunctioning in cold water conditions. Additionally, its over-balanced diaphragm first stage design gives you better breathing performance at greater depths.

PRICED RIGHT AT \$699.00

SCUBAPRO REGULATOR SAVINGS EVENT

VALID UNTIL JUNE 30

Purchase a Scubapro regulator system and receive a free R105 Octopus. Offer only valid on the following select qualifying regulators: MK17 EVO 2/S620 Ti, MK25 EVO/S620 Ti, MK17 EVO 2/G260, MK19 EVO/G260, MK25 EVO/G260, MK19 EVO/A700, MK25 EVO/G260, MK25 EVO/S600
