**Wichita CPR Training**  
Provided by Amber Waves Diving Company

Wednesday July 15, 2026 CosmoSphere Discover Scuba Program. Young people from all over the country come to Kansas to attend a space camp designed by the CosmoSphere in Hutchinson. Thanks to Instructors Blaine Garrett and Dan Wegner along with Dive Master Mark Schwabe for providing a safe, informative, and FUN experience for these young people.

Pictured above is our Sunday First Aid Class Graduates.

Instructors Dan Wegner and Tom Pryor helped this group through the first phase of their scuba training.

## TRAINING AT BEAVER LAKE ARKANSAS

Beaver Lake is a man-made reservoir in the Ozark Mountains of Northwest Arkansas and is formed by a dam across the White River only a few hours drive from Wichita. Beaver Lake waters are deep, clean, and clear. Beaver Lake is optimal for scuba diving because the water is deep and visibility is great making for interesting sites. JOIN US TO FINISH YOUR CERTIFICATION!

## Amber Waves DIVING COMPANY

WICHITA CPR TRAINING

### ONLY TWO SPOTS LEFT

### CAT PpALU

May 8-14 2027

The charter sailboat Cat Ppalu offers sailing and diving cruises in the Bahamas with accommodations for up to 12 passengers. This crewed charter will offer you and your family and friends the ultimate sailing and diving adventure! Charters are tailored to make your vacation one you will all remember for a life time! The catamaran design ensures a stable ride on the gin clear waters of the Exuma Cays- a remote and glorious chain of islands in the Central Bahamas. We at Amber Waves Diving have chartered the boat for May 8-14 2027, which we believe is the best time of year. The crew will handle all of the details, with an open bar and all beverages, meals, water sports and diving included in the price, it's comparable to an all-inclusive resort vacation, only the service is much more personal on a live-a-board sailboat. This is priced right at **\$2,180** which includes port tax and park fees. This trip does not include air fare, gratuities, hotel expenses, personal dive equipment or trip insurance. **SIGN UP TODAY AND RESERVE YOUR SPOT WITH A \$500 DEPOSIT.**

BRYSON POST WADE WILSON LINDA HENSON

### PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, planning, organization, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

### PADI Peak Performance Buoyancy Specialty Course

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

In the PADI Peak Performance Buoyancy specialty course, you'll learn important skills that will make you a better, more advanced scuba diver.

This specialty course will teach you:

- How to trim your scuba gear so you can find balance while diving.
- How to determine the exact weight so you're never too light or heavy in the water.
- Techniques to save air, glide more smoothly, and hover in vertical and horizontal positions.

### NIGHT DIVER

### Who should take this course?

The thought of dipping below the surface at night seems mysterious, yet so alluring. Although you've been scuba diving at a site many times before, at night you drop into a whole new world and watch it come to life under the glow of your dive light. The scene changes as day creatures retire and nocturnal organisms emerge. If you've wondered what happens underwater after the sun goes down, sign up for the PADI Night Diver Specialty course.

What will you learn?

### ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

### Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation device, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

PEAK PERFORMANCE-BUOYANCY  
GETTING AND STAYING NEUTRAL  
BETTER AIR CONSUMPTION  
BUILD SELF CONFIDENCE

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!
