

Thanks to Instructors Marc German and Cliff Mason for spending their holiday training SCUBA students. Everyone had a 'Bang-over' time.

Sunday first aid graduates pictured above.

### WHY BUY GEAR?

Whether an item of dive gear is considered essential or desirable, each was conceived and developed to satisfy a definite need and perform a specific function. From regulator to gauges, mask to fins, and buoyancy compensator to wet suit, recreational scuba equipment is purposeful, interesting to use, and a big contributor to the overall fascination and attraction of diving. Acquiring your own dive equipment is a major factor in the enjoyment of the sport. Sure, you can rent gear at many dive destinations, but do you really want to rely on the availability of much-used rental equipment for your personal safety and enjoyment of diving?

Owning your own dive gear has many advantages. As a beginning Open Water certification student, you can speed your learning curve and progress quickly into the open-water environment by purchasing and using a basic dive equipment package: regulator and BC in addition to mask, snorkel, and fins. Learning how to scuba dive involves a lot more than learning how to breathe through a regulator underwater. You learn the art of buoyancy control, the subtleties of swimming and streamlining, and a host of other skills. Acquiring these skills quickly and comfortably has a lot to do with the equipment you use in training. If the BC is too small, you will struggle with it, which interferes with your learning. Fit and comfort are the prime criteria in selecting most items of dive gear, and in achieving maximum safety and pleasure underwater. Owning your own gear is the best way to ensure that your gear fits correctly and comfortably.

Even if loaner or rental equipment fits well, it may not be right for you because of particular features — or lack of them. Features are what distinguish one item of dive gear from another. When you buy your own gear, you evaluate and choose the features you need and appreciate. The process is fun, adds greatly to your knowledge of diving, and ensures that the gear you dive with does what you want it to, the way you want it to.

You will know how to operate it properly and care for it responsibly. You will know the condition of your gear, where it has been, and who has been using it. That familiarity contributes to the highest level of safety, which in turn gives you peace of mind. Other less obvious but still important benefits accrue from owning dive gear. Buying gear deepens your relationship with your dive store. That store is your conduit to diving. We offer training opportunities, arranges trips, keep you in contact with other divers, and services and support your equipment. Having your own equipment also marks you as a serious, committed diver, and it encourages you to dive regularly and stay involved in the sport.

The bottom line on equipment ownership: It's the way to achieve maximum enjoyment of diving. At Amber Waves Diving we recognize that once a customer buys their own gear they actually become a 'committed diver,' one that we see more than just once a year. Therefore, we believe that part of the commitment you are making to learn to dive should include acquiring your own dive gear. It's an excellent investment in yourself and in your future diving adventures.

### SCUBA SCHOOL

JULY 10-12	BEAVER LAKE OPEN WATER TRIP. FINISH YOUR OPEN WATER CERTIFICATION, YOUR ADVANCED CERTIFICATION AND MOST SPECIALTIES ON THIS WEEKEND.
JULY 17-19	OPEN WATER PART ONE (CLASSROOM AND POOL SESSIONS)

### ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

#### Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

**PEAK PERFORMANCE BUOYANCY**  
**GETTING AND STAYING NEUTRAL**  
**BETTER AIR CONSUMPTION**  
**BUILD SELF CONFIDENCE**

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

**EXPERIENCE A DIFFERENT KIND OF NIGHT LIFE**

### SHERWOOD SCUBA

**THE NEW SHERWOOD WISDOM 5 COMPUTER IS ON IT'S WAY**
