Pictured above is our Sunday afternoon First Aid Graduates. Call today and schedule your training (316-775-6688).

IDC PADI Instructors Jennifer Fritz and Michael Jernigan teamed up to complete the PADI classroom and pool session for this group of students. They are now off to Beaver Lake to finish their PADI Open Water Training

Dive Master David Stucky completed a PADI Scuba Review for this couple who headed on vacation soon.

We are always asked about the water clarity of Beaver lake. Instructor Brian Harvey took this picture of a catfish hiding in the rocks near our training site. Looks pretty clear to me. Great PIC Brian!

TRAINING AT BEAVER LAKE ARKANSAS

Beaver Lake is a man-made reservoir in the Ozark Mountains of Northwest Arkansas and is formed by a dam across the White River only a few hours drive from Wichita. Beaver Lake waters are deep, clean, and clear. Beaver Lake is optimal for scuba diving because the water is deep and visibility is great making for interesting sites. JOIN US TO FINISH YOUR CERTIFICATION!

AMBER WAVES DIVING REPAIR CENTER

Properly functioning gear is crucial
Your safety depends on it. That's why we are the best technicians in the business to service your gear.

What to expect

We are certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

ADVANCED OPEN WATER COURSE

The Advanced Open Water Diver Course (AOW) is the next step in learning advanced skills directly applicable to scuba diving. Frequently, an AOW card is just the ticket to diving at a variety of more sites. For example, we know of several places in the Philippines, Malaysia, Australia, and some wreck sites in Florida who will not let you dive at certain, more advanced sites, unless you have the AOW or above certification. The reason is that the operators don't want to risk putting OW divers into certain advanced level dive conditions such as currents or deep, blue water, environments. They know that PADI AOW certified divers have the skills and experience necessary for such sites.

There are a total of 5 dives necessary to complete the course. The required 2 Core dives are Deep and Underwater Navigation. You can choose the remaining 3 Adventure Dives. This course is for newly certified divers as well as divers with more experience who wish to expand their knowledge and practical skills. Also, if you don't have enough time to complete the full AOW course, the Adventure Diver rating is awarded after completion after any 3 Adventure Dives.

Why should you take the Advanced Open Water Course?

Open Water Divers have learned the basics, the "how" of diving. After a few dives, there is a need to expand that dive knowledge and learn practical skills which can increase your enjoyment of diving. Ever surface far away from the boat and have a long surface swim back? With the Navigation dive, you will learn how to prevent that situation, using compass as well as natural navigational aids to assist in your underwater journey. For deep diving, there are special concerns, and as an Open Water Diver, you are certified to dive 18 meters/60 feet. After completing the AOW course, that level is extended to 30 meters/100 feet.

If you really want to advance your skills and be more comfortable in the water, taking this course is the way to do it. We have openings for the Beaver lake trip. Give us a call and schedule your course today!

EXPERIENCE A DIFFERENT
KIND OF NIGHT LIFE

PADI DEEP DIVER TRAINING

Now that you have several dives, you may want to do deeper dives. The Deep Diver course will get you over the apprehension of the unknown and give you more confidence through knowledge and experience.

The purpose of the PADI Deep Diver Specialty Course is to familiarize divers with the skills, knowledge, planning, organization, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 60 feet to 130 feet. The Deep Diver specialty course is intended to serve as a safe, supervised introduction to deeper diving within the limits of recreational scuba diving.

PADI Peak Performance Buoyancy Specialty Course

You've all seen those divers. You know – the ones who seem to move through the water without the slightest effort. Those scuba divers are neutrally buoyant, which means they don't sink or float while diving. Achieving neutral buoyancy is no easy feat, which is why divers who have mastered the skill stand apart from the others. If you want to become neutrally buoyant and become a better scuba diver, take the PADI Peak Performance Buoyancy specialty course.

In the PADI Peak Performance Buoyancy specialty course, you'll learn important skills that will make you a better, and a more advanced scuba diver.

THE NEW WISDOM 5N0W
IN STOCK

AQUALUNG

Aqualung presents us with the Helix, Pro a mid-priced regulator, which enjoys very good performance, undoubtedly above expectations.

It represents the DNA of the Aqualung regulators. It is without question the best option in terms of value for money currently available.

The Helix Pro version has two added features:

Aqualung's patented ACD system, technology that protects the first stage from accidental entry of water or dirt even when the regulator is not under pressure.

And sealed ambient pressure chamber, suitable for cold and/or polluted waters.

\$699.00

Suunto Nautic Dive Computer w/ Bungee Cord & Tank Pod

Made for Every Dive and Every Diver
From recreational dives to technical missions, Suunto Nautic grows with your passion. It supports single- and multi-gas configurations, dive views let setups, and full decompression planning. Customizable dive menus let you choose what matters most at every depth. Whatever your dive style, Nautic adapts to it seamlessly.

Real-Time Awareness, Wireless Precision
Wireless tank pressure tracking gives divers real-time gas readings and consumption data at a glance. Dual transmitter support makes it easy for sidemount divers to follow both tanks simultaneously, while clear, color-coded visuals keep you instantly informed throughout the dive.

Stay Oriented Above and Below the Surface

Suunto Nautic integrates essential navigation and safety tools to keep you oriented wherever you dive. Offline maps and GPS help plan and track your routes, while the built-in digital compass provides precise direction underwater. Tide, weather, and sunrise/sunset data support safe surface intervals, and the integrated flashlight gives visibility and

THE NEW MK11 EVO/R105

This regulator is a simple, rugged and reliable air delivery system. The MK11 EVO is a compact balanced diaphragm first stage with a forged brass body fitted with thermal fins and protective plastic bumpers to ward off scratches. The R105 delivers smooth, dependable air flow from its classic downstream valve design. Built to last, the R105 features a durable metal valve housing and an anti-scratch front cover.

Scubapro MK11/C370 Regulator

SCUBAPRO
UWATEC
PROFESSIONAL DIVING EQUIPMENT

The Mk11 First Stage Regulator is the perfect choice for the recreational diver who wants the advantage of a diaphragm first stage for use in temperate waters. Diaphragm-based first stages are environmentally sealed so that water cannot enter the inner mechanism.

PRICED RIGHT AT \$699.00

Zeagle

TESTED. TRUSTED.

Stiletto BCD

Here's a good alternative to any TRAVEL BCD made.

The Zeagle Stiletto has sufficient lift and sufficient capacity for most average sized divers to use in their local environments, yet packs easily into a lightweight travel system. The BCD's back inflator bladder supplies a lift capacity of 35 lbs (15.9kg). BCD includes the Ripcord Weight System that has 24 lbs (10.9kg) of releasable weight capacity and an additional 16 lbs (7.26kg) rear non-releasable trim pockets capacity. Attachment of accessories is made easy with the five-stainless steel D-rings, three on the vest and two more on the shoulders. BCD has two zippered utility pockets for added storage of accessory items.

Best Feature is that this BCD is made in the USA
