We have certified technicians that always follow manufacturer guidelines. Conscientious and thorough, we examine every part of your gear. We're always on the lookout for wear and corrosion, immediately swapping out anything worn or damaged. We want your next dive to be your best dive!

FIRST AID TRAINING IS A MUST

There are numerous reasons why people don't take First Aid training programs;

- They are too busy
- They don't know where to go
- They think that they already have enough knowledge, or
- They think that accidents happen to other people not to them or their friends, family and colleagues.

Ask any individual who has taken a first aid training program if it was worth it and their answer will be "Yes!" Having some basic first aid knowledge is essential and here are 5 reasons why. It does more than help save lives.

It's true that having first aid training undoubtedly helps save lives. That's not all though; giving appropriate first aid immediately can help to reduce a person's recovery time and make the difference between the patient having a temporary or long term disability. You'll learn how to remain calm in emergency situations and you'll learn simple acronyms to help you recall the steps you need to take. First aid training will make you confident and comfortable and therefore more effective and in control when you need to be.

It enables you to increase patient comfort.

Not all accidents, injuries or illnesses require a trip to the hospital but it doesn't mean they don't cause pain and suffering to the patient. A child crying because of a bruised elbow or with a fever is in pain and is suffering. By knowing how to act – even just by employing simple techniques such as applying an ice pack correctly, or utilizing appropriate bandaging, you'll help to relieve their discomfort. You'll also provide emotional support by remaining calm and collected which will make them feel more secure and reduce their anxiety levels.

It gives you tools to prevent the situation from becoming worse.

In some situations if a patient doesn't receive basic first aid care immediately their situation will deteriorate – often rapidly. By being able to provide basic care you can stabilize a patient until emergency medical services arrives. You'll learn how to use basic household items as tools if a first aid kit is not available meaning that you'll be able to cope with many situations.

You'll also be trained in how to collect information and data about what happened and the patients' condition. This information will be passed on to the emergency services, which saves them time – you will be a valuable link in the chain of survival.

It creates the confidence to care.

Having a basic first aid knowledge means that you'll be confident in your skills and abilities in relation to first aid administration. By taking first aid training, it helps you to reflect on yourself and how you and others react in certain situations. Having this understanding will boost your confidence in a wide range of non-medical day to day situations.

It encourages healthy and safe living.

One of the first things you will learn during your first aid training is that you must look after yourself and ensure your own safety as a priority. It's not being selfish, it's being practical. Keeping yourself safe means you are in a position to help others rather than needing help yourself. You will also learn about the importance of healthy living and how lifestyle habits and choices can increase or decrease your risks of developing problems such as coronary heart disease. Having this knowledge makes you more aware of your own health and alert to potential hazards posed by your surroundings.

The Emergency First Response Secondary Care program provides comprehensive first aid training which will prepare you for a wide range of situations and give you the confidence and knowledge of how to deal with them quickly, correctly and efficiently. Our sister company WICHITApcrTRAINING not only offers EFR Certification but we also offer certifications in American Heart Association, Red Cross, and American Safety and Health Institute. We not only train SCUBA divers, but a host of other users such as health care providers (BLS), day care providers, personal trainers, corporate organizations, and many others. Call to sign up for a course.

We all know Albert Einstein was a genius...

... but his brother Frank was a monster.

Suunto Nautic Dive Computer w/ Bungee Cord & Tank Pod

Made for Every Dive and Every Diver

From recreational dives to technical missions, Suunto Nautic grows with your passion. It supports single- and multi-gas configurations, sidemount setups, and full decompression planning. Customizable dive views let you choose what matters most at every depth. Whatever your dive style, Nautic adapts to it seamlessly.

Real-Time Awareness, Wireless Precision

Wireless tank pressure readings gives divers real-time gas readings and consumption data at a glance. Dual transmitter support makes it easy for sidemount divers to follow both tanks simultaneously, while clear, color-coded visuals keep you instantly informed throughout the dive.

Stay Integrated Above and Below the Surface

Suunto Nautic integrates essential navigation and safety tools to keep you oriented wherever you dive. Offline maps and GPS help plan and track your routes, while the built-in digital compass provides precise direction underwater. Tide, weather, and sunrise/sunset data support safe surface intervals, and the integrated flashlight brings visibility and
